- a guide to patient management (6th edition 2016) and two interactive DVD's: Emergency Medicine (2nd edition, 2008) and Malamed's Local Anesthetic Technique DVD (2004) (edition 2 - 2012) In his spare time, Doctor Malamed is an avid runner, exercise enthusiast, and admits an addiction to the New York Times crossword puzzle, which he has done daily since his freshman year in dental school.

Course Title: EMERGENCY MEDICINE in PEDIATRIC DENTISTRY

Stanley F. Malamed, D.D.S. Life-threatening emergencies can occur anytime, anywhere and to anyone. Though rare in pediatric dentistry, emergency situations are more likely to occur within the confines of the dental office due to the increased level of stress which is so often present. In this program Dr. Malamed will discuss preparation - involving the office and staff and includes a thorough review of the office emergency kit (drugs and equipment) and recognition and management of emergency situations that commonly occur in dentistry. This course is designed for all members of the dental office staff, not just the doctor and chairside personnel. Situations discussed here can happen outside of the dental environment as well as in the office. Everyone should be prepared!

OUTLINE

Introduction

Preparation for medical emergencies: Office staff Emergency drugs and equipment

Recognition and management: Seizures Syncope Asthma Allergy Drug Overdose - Local anesthetics Drug Overdose - Sedatives

Summary

Learning needs:

Following completion of this course the enrollee should be able to: (1) Describe the basic management protocol for medical emergencies (2) List and describe the indications for the 7 basic emergency drugs (3) Describe the management of seizures (4) Describe the clinical signs and symptoms of respiratory distress (5) Describe the management of respiratory distress (6) Describe the clinical signs and symptoms of allergic reactions (7) Describe the management of allergic reactions (8) Describe the management of drug overdose reactions - local anesthetic and sedative
