AAPD President

Greetings to all AAPD Members!

AAPD 2020 is approaching quickly and this year's meeting will be held in Nashville, Tenn. Nashville is a fabulous city, rich in history with many places to visit!

Nashville is a prosperous city, which has become known as Music City, USA, following the advent of the Grand Ole Opry in 1925. Vanderbilt University is located in Nashville and is a short distance from downtown. Likewise, the famous Nissan Stadium, which is home to the Tennessee Titans, and the Bridgestone Arena, which houses the Nashville Predators, are city attractions. But, of course, it is the music that so many visitors come to Nashville to enjoy and you will find it easily accessible throughout downtown and the city.

Places to visit include the Country Music Hall of Fame and Museum, the Grand Ole Opry, the Johnny Cash Museum and Café, the Nashville Zoo, Ryman Auditorium, which housed the original Grand Ole Opry and the Musicians Hall of Fame and Museum and, of course, Broadway Street.

AAPD 2020 will begin on Thursday, with our preconference course, "Diagnosis and Management of Dental Trauma in Children and Adolescents". This session offers clinical recommendations from top content experts on how to manage traumatic injuries, including pulp regeneration, auto transplantation, orthodontic care, and esthetic restoration of traumatized teeth.

Be sure to catch a live performance by John Rich—singer, songwriter and one half of the iconic country duo, Big & Rich, during the Opening Ceremony! Big & Rich have albums that have produced four straight Top 40 Country hits, including their most famous song, Save a Horse, Ride a Cowboy. John Rich will bring a lively performance to kick off AAPD 2020 that you won't want to miss!

Josh Sundquist, former U.S. Paralympian, will provide an inspiring Keynote Address, while incorporating a few laughs along the way.

Our Scientific Program Committee has created an outstanding line-up of speakers and topics. To highlight a few sessions, there will be Minimally Invasive Management of Caries, Hot Topics in Pediatrics (including vaccine and fluoride hesitancy, as well as HPV vaccine promotion) and Oral Pathology. There will be a diverse course selection for you to choose from, which will certainly satisfy a broad range of interests.

The Welcome Reception will be on Friday at the George Jones Smokehouse and Museum and the Wildhorse Saloon, with surrounding outdoor activities along the Cumberland River. Live music, great food and other entertainment will make this Welcome Reception a spectacular event!

The AAPD Foundation will have their Gala at Marathon Music Works. As always, it will be a beautiful evening of food, drink, and camaraderie, all in support of the dedicated mission of the AAPD Foundation – providing dental homes for children.

The President's Farewell Dinner will be an amazing event. The reception and dinner will be held at the Country Music Hall of Fame and Museum. Enjoy cocktails as you move through the museum culminating with a visit to the 70-foot-high rotunda, which houses the bronze plaques of every member honored by entrance into the Country Music Hall of Fame! You will enjoy recordings, photographs, musical instruments, and short films of iconic country musicians. Please come to this unique venue so that together we can celebrate the year's completion! Everyone is invited to attend!

I am looking forward to AAPD 2020, meeting with friends, enjoying great food and venues, and attending our world-class continuing education. I extend a special thank you to the local arrangement co-chairs Kurt Swauger and Martha Wells, as well as AAPD's incredible meetings team for all their hard work in planning and organizing our meeting.

I personally invite each of you to attend AAPD 2020 and experience all that our meeting and Nashville have to offer.

Drs. Kurt Swauger & Martha Wells
AAPD 2020 Local Arrangements Chairs

Welcome to AAPD 2020 in Nashville!

Welcome to AAPD 2020 in Nashville, Tennessee! Music City USA is the center for country music, singers, and songwriters from all over the world. The Ryman Auditorium was built in 1892 as the largest auditorium south of the Ohio River. It is known as the Mother Church of country music. The Grand Ole Opry is an American icon, the longest-running radio show in America, and has helped launch the careers of countless country musicians. Nashville isn't just country music; music of all types can be found here. It is the home of the Nashville Predators and the Tennessee Titans. Nashville is a vibrant, growing city, breaking out with new businesses, delivering a dynamic food and cocktail scene, and hosting stunning outdoor scenery. However, music is the common thread that is woven into Nashville's social fabric. The bright lights of Broadway are a reminder that this is the place where music is written, recorded, and performed 365 days a year.

AAPD 2020 will take place at the Music City Center located in downtown Nashville. It is surrounded by numerous hotels, restaurants, and entertainment venues. Tour the Country Music Hall of Fame and the Ryman Auditorium to experience the evolution of one of the fastest growing and most influential genres of music. Nashville also boasts the museums of the country legends: Johnny Cash, Patsy Cline, and George Jones. For fresh air, enjoy the beauty of outdoor Nashville at Centennial Park, where verdant greens attract wildlife around a gorgeous lake with waterside paths all against the backdrop of a full-scale replica of the Greek Parthenon. Take an afternoon stroll through Hillsboro Village or East Nashville to check out local shops, restaurants, and cafes. Explore Green Hills for the city's most popular retailers. Go antiquing in the charming historic downtown Franklin. For the history buffs, explore the Carter house to find out about a decisive battle in the Civil War.

The Welcome Reception will be held at multiple venues centering on 2nd Avenue. The Wildhorse Saloon will offer live music, line dancing, and Southern cuisine. Experience George Jones' legacy at the George Jones Museum, and see his memorabilia up close and personal, immersing yourself in his powerful story. To the east, you can find Riverfront Park with fun for the whole family.

On behalf of the American Academy of Pediatric Dentistry and the Local Arrangements Committee, we would like to welcome you to Nashville for the 73rd Annual Session. The Scientific Program Committee has been tireless in organizing a program and line-up of speakers that brings contemporary topics to the forefront. We are certain that you and your staff will find the topics appealing: trauma management, behavior guidance, interceptive orthodontics, minimally invasive caries management, and more!

We would like to thank John Rutkauskas and the AAPD staff of Kristi Casale, Colleen Bingle, Caroline Oliva and Kelly Stancato for their hard work in helping to plan the wonderful venues for the program. Mark your calendars and please join us at AAPD 2020 in Nashville, May 21-24.

Sincerely,

Kurt Swauger and Martha Wells

General Information

Audio Recordings and Online CE

Make the most of your educational experience at AAPD 2020 and purchase access to the audio content. Remind yourself of the important takeaways you heard or hear a compelling course you may have missed. This multimedia offering is an excellent training tool and informational resource. You can purchase access with or without earning CE credits. The audio and PowerPoint presentations will be synced!

Audio Recordings*

The Audio Recordings will give you online access to the slides synchronized to audio from the scientific sessions, MiniClinics, and String of Pearls. With so many great sessions being offered at AAPD 2020, you won't want to miss a single second, and now you don't have to.

** You will not earn CE with the Audio Recordings package. To earn CE, please purchase the AAPD 2020 Online CE package.*

AAPD 2020 Online CE

AAPD is offering CE for those courses at Annual Session you cannot attend. With such great topics and speakers lined up, it's difficult to choose which session to attend. In the Education Passport, you will have the opportunity to purchase and earn CE for all sessions recorded in Nashville. Purchase the entire Annual Session package now or individual sessions will be available for purchase after the meeting.

Content for both offerings will be available for five years after the event.

ADA

AAPD conferences are ADA compliant. We strive to take the appropriate steps required to ensure that no individual with a disability is excluded, denied services, segregated or otherwise treated differently. Individuals requiring special assistance must make the appropriate notation on the registration form and/or contact the AAPD Meeting Department. All requests for special accommodations under ADA must be made allowing enough time for evaluation and appropriate action by AAPD.

Attire

The Scientific Program is casual. We recommend you have a sweater or light jacket available in case you find the meeting rooms too cold. The Welcome Reception is casual; come dressed in your favorite country western attire. The President's Farewell Dinner is business casual.

Conference App – Coming April 2020

Attention all smart phone users and tablet owners! The AAPD continues to provide a comprehensive conference app for AAPD 2020 to keep you engaged before, during and after the meeting. The event app includes a complete list of sessions, speakers, exhibitors, local attractions, facility maps and much more!

The conference app, Online Itinerary Planner, interactive floor plan and the ePoster Gallery are linked. Create an account, login and mark your favorite exhibitors or sessions...when you login to the app, it will all be there! Once AAPD receives the speaker handouts, they will all be included in the app and the Online Itinerary Planner providing you a comprehensive educational tool both online and in your hands.

Download our dedicated Poster App which includes full color posters as well as the abstract allowing you to sort by topic, track, day and presenter. Check out this opportunity to see this important research!

ePoster Gallery and Posters Sponsored by My Kid's Dentist and Orthodontics

Continuing Education Credit

The AAPD is an ADA CERP Recognized Provider. Credit is awarded on an hour-for-hour basis. Attendees should claim only those hours of credit that they actually spent in the educational activity.

ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry.

Photography/Video Waiver

AAPD plans to take photographs and/or video at AAPD 2020 and reproduce them in AAPD educational, news or promotional material, whether in print, electronic or other media, including the AAPD website. By participating AAPD 2020, you grant AAPD the right to use your name, image and biography for such purposes. All postings become the property of AAPD. Postings may be displayed, distributed or used by AAPD for any purpose.

Nashville boasts abundant sunshine and average temperatures in the 57 to 78 degrees range make the weather attractive for tourists.

Travel Information

Airline Discounts

AAPD offers discounted meeting fares on various major air carriers for AAPD meeting attendees. To receive these discounts, please contact Direct Travel, AAPD's official travel provider at (800) 840-0908. As always, to obtain the lowest available fares, early booking is recommended.

Getting There

All hotels for AAPD 2020 are located in the downtown Nashville area. Downtown Nashville is a 20 minute ride from Nashville International Airport (BNA). Shuttle and car service are available from the airport to the hotel. Uber and Lyft are also available from the airport and around Nashville.

Exhibit Hall

Maximize your time at the Annual Session and visit the exhibit hall to explore products and services geared toward you and your pediatric dental office. Visit the AAPD Store where you can pick up a souvenir from AAPD 2020! Spend some time in the AAPD Foundation's Donor Lounge to learn more about the Access to Care Grants or simply to make a donation or increase your current pledge to the Foundation.

The exhibit hall schedule is created to maximize your time with the exhibitors while still providing time to attend the education courses. The Hospitality Area is located on the exhibit hall floor offering a continental breakfast, refreshment breaks each morning and afternoon. Lunch is available for purchase on Friday and Saturday.

Visit the AAPD Store to see what prizes you are eligible to win in the exhibitor drawing. Be sure to check out the My Kid's Dentist & Orthodontics Research Poster Competition and the Tech Bar!

Exhibit Hall Schedule

FRIDAY, MAY 22	SATURDAY, MAY 23
9 AM – 5 PM	9 AM – 5 PM
11:30 AM – 2 PM	11:30 AM – 2 PM
Lunch for purchase	Lunch for purchase
	SUNDAY, MAY 24
	9 AM – 12PM
	10 AM RAFFLE

Raffle in Exhibit Hall

Feeling lucky? The AAPD is hosting a raffle for all attendees! Take the raffle card found near registration and visit with 20 exhibitors and get a stamp. Once you've filled out your raffle card, bring it to the AAPD Store in Booth 714. The raffle takes place in the AAPD Store on Sunday, May 24, at 10 a.m.

Walking Challenge

New this year, stay active during AAPD 2020 by participating in the walking challenge! Stay tuned for more information regarding Sprig Walking Challenge app.

My Kid's Dentist and Orthodontics Research Poster Competition

FRIDAY, MAY 22 AND SATURDAY, MAY 23

My Kid's Dentist & Orthodontics Research Competition is available in the exhibit hall. Different topics are presented each hour. Stop by to meet the authors and discuss their presentations with them! A poster OnDemand Station is available in the area for attendees to view the eposters at any time. Be sure to download the Poster App to access all the posters.

Sponsored by My Kid's Dentist and Orthodontics

The Tech Bar: Gadgets & BYOD

Learning can be fun, so come to play!

Cool gadgets will be on hand including virtual reality goggles, smart watches, infrared keyboards, and more. The future of tech is here—and so much of it is wearable. Come check it out.

A number of educational sessions will be offered throughout the meeting which are geared toward helping you learn how to use social media to build your practice, online reputation management, branding and much more!

BYOD! Often your biggest obstacles are with the devices you already own, so bring your own device for in-hands tips and solutions you didn't know were possible. Ask the toughest tech or app questions, and walk away much more efficient.

Podcast Studio

Be sure to stop by the Podcast studio to listen to exciting topics being recorded for AAPD's very own podcast, Pedo Teeth Talk!

Sponsored by Hu-Friedy

Career Fair

SATURDAY, MAY 23

3 – 5 PM

The Career Fair is a great opportunity for a new pediatric dentist seeking their first practice position or the more experienced dentist who is looking for a change to network with hiring organizations. New this year, come enjoy a cocktail while you network!

For more information on exhibiting or to download the Career Fair form visit <http://annual.aapd.org/networking/> or contact Kelly Katona at kkatona@aapd.org. The cost to exhibit for AAPD members is \$150; recruitment companies may exhibit at the price of \$500.

Sponsorship Opportunities

Wondering what kind of exposure your company can get at the AAPD Annual Session? Look no further. There are various opportunities still available to target your company's goals and meet your budget!

For more information on becoming a sponsor for the AAPD, please visit <http://annual.aapd.org/sponsorship/> or contact Meetings, Exhibits and Sponsorship Manager Colleen Bingle at cbingle@aapd.org or (312) 337-2169.

Diagnosis and Management of Dental Trauma in Children and Adolescents PD, DT

Thursday, May 21

8:30 AM – 4:45 PM

Jessica Lee; Asgeir Sigurdsson; Gustavo Oliveira; Dick Barendregt; John Christensen

LEE

SIGURDSSON

OLIVEIRA

BARENDREGT

CHRISTENSEN

This exciting CE offering course will offer busy clinicians an update on the current concepts and innovative approaches in diagnosis, management and treatment of dental trauma in children and adolescents. The format will feature a review of up-to-date fundamentals and emerging approaches most to be illustrated by case reviews. Hear from a group of internationally recognized expert speakers in dental trauma. Using the best evidence, we will discuss avulsion therapy from A to Z and bring participants up-to-speed with new concepts in avulsion care. The concept of decoronation and pulp regeneration will be presented and illustrated with clinical cases. Participants will also learn the best operative and orthodontics techniques to achieve optimal esthetic results. Be sure to plan on staying for the afternoon when the exciting area of tooth autotransplantation in children will be presented.

Using a variety of actual clinical case reviews, participants will learn:

- Up-to-date science in the area of diagnosis permanent tooth dental children and adolescents.
- Fundamentals of pulp regeneration.
- How and when to perform decoronation.
- Operative and orthodontics techniques to achieve optimal esthetic results.
- The emerging area of tooth autotransplantation. Recognize the legal ramifications of providing interventions on tough issues.

Session is recorded.

Session is ticketed.

John Rich and Josh Sundquist

Friday, May 22

7:30 – 9 AM

BADGES ARE REQUIRED FOR ENTRY*

Be sure to catch a live performance by John Rich—singer, songwriter and one half of the iconic country duo, Big & Rich, during the Opening Ceremony! Big & Rich’s albums have produced four straight Top 40 Country Hits, including their most famous song, Save a Horse, Ride a Cowboy. John Rich will bring a lively performance to kick off AAPD 2020 that you won’t want to miss! Get your seat early!

After the opening act, stay for our keynote address by Josh Sundquist. Sundquist has accomplished becoming a National Bestselling author, surviving cancer and participating on the USA Paralympic Ski Team, and he’s just getting started. His experiences thus far in life have taught him to adopt the 1MT1MT (one more thing, one more time) mentality. Plan to be inspired by this motto through Josh’s high-energy blend of humor and storytelling.

Sundquist’s journey will be sure to remind us of how all of our stories are truly interconnected. Sometimes, even our smallest actions and decisions can impact the world around us. Through your newfound commitment to the 1MT1MT motto, he will show you how to face adversity with strength and courage, be resilient during times of change and plan for the future with an expanded vision of what could be possible.

**Attendees must be registered for AAPD 2020 to attend the Opening Ceremony and Keynote Address. Badges will be checked upon entrance.*

Learning Labs I

PD, DT

Friday, May 22

(ticketed session)

These informal, small, one-hour long group settings encourage interaction between the speaker and the attendees. Snacks and beverages are included in the ticket price, \$50. Register for Learning Lab sessions during registration; they may be sold out on-site.

8 – 9 AM

LL 01 Vaping – A New Look at Nicotine Addiction and It’s Link to Drug Addiction in Teens

Lance Kisby, D.M.D.

Vaping has created concern among health professionals. Ironically, it creates a type of neuronal learning which leads directly to smoking cigarettes and an increased risk to cocaine addiction. Dental professionals need to know vaping’s role in the caries process as well as other oral and systemic pathologies.

9:10 – 10:10 AM

LL 02 Social Media Marketing for the Pediatric Dental Office

Jarod Johnson, D.D.S.

While most offices are open throughout the week; patients and potential customers are looking for answers outside of business hours. During these hours a website and social media presence are valuable assets to provide education and information. This lecture focuses on strategies to engage current and potential patients.

10:20 – 11:20 AM

LL 03 Oral Facial Growth Guidance, Limitations in Interceptive Orthodontic Treatment

David Gillham, D.D.S., M.S.D.

Though challenging, each of us know that interceptive orthodontic treatment can become very rewarding, even to recognize the opportunity to “shape a child’s face”. Our professional training will help us recognize etiological Phase One issues, toward simplifying possible Phase Two treatment with an established orthodontist-friend.

11:30 AM – 12:30 PM

LL 04 Modern Management of Incipient Carious Lesions

Varinder Goyal, B.D.S., M.D.S., M.F.D.S. RCPS (GLASGOW)

Caries lesion can be arrested at any stage of lesion development provided that plaque-free conditions are maintained. Professionals must become aware of the importance of early identification of disease and individuals at high risk of developing caries so that they may receive early preventive intervention.

12:40 – 1:40 PM

LL 05 Branding and Trending for Your Practice!

Oshmi Dutta, B.D.S., D.D.S., M.S, F.R.C.D (C)

Are you a brand of one? What is the advantage of being a recognizable brand in today's fast-paced consumer-centric world? A brand needs to tell the story of your service, values, and mission all at the same time. This is an introduction to the elements that make great brands.

1:50 – 2:50 PM

LL 06 Are the Pediatricians Referring to You?

Craig Hollander, D.D.S.

A discussion of time-tested methods to increase referrals into your office by pediatricians and general dentists and help increase your visibility within your professional community.

3 PM – 4 PM

LL 07 Quick Yoga Stretches & Mindfulness Breathing to Manage Stress & Skeleto-Muscular Problems

Bhagwati Mistry, D.D.S., M.D.S., Diplomate ABPD, 500Hrs Cert Yoga Teacher

Explore evidenced based 2-5 minutes simple yoga stretches joint rotations, six movements of spine, posture alignment integrated with rhythmic mindfulness breathing to reduce stress, create health and vitality, enhance focus, increase resilience to burnout, improve posture and reduce or prevent musculo-skeletal problems.

4:10 PM – 5:10 PM

LL 08 “Naughty or Nice” – the Medicaid Conundrum

Shukan Kanuga, D.D.S., M.S.D.

Medicaid children are the highest risk and underserved patient population when it comes to dental disease. Bureaucratic hurdles, excessive paperwork and lower reimbursement rates often make it formidable for many practitioners to include them as their patients. Opening up our practices to the most needy patients may be rewarding after all.

100. Targeted Behavioral Interventions to Manage Fearful Patients PD, DT

Friday, May 22

9:30 AM – 12:30 PM

Purnima Rathi Hernandez, D.D.S., M.A., B.C.B.A.

Having trouble managing problem behavior of your child patient for the simplest of procedures? Then this lecture is perfect for you. Even the simplest of dental procedures may often elicit a fear response. This may evoke problem behavior which may interfere with the safe delivery of dental treatment. Often the provider may use the basic behavior guidance procedures to

help guide the child. However, this is often done through a trial and error process. Understanding behavioral functions in dental environments may help in developing targeted interventions which may result in better outcomes. This lecture will present the foundations in behavior management from the area of Behavioral Sciences. The lecture will make the case for understanding the purpose of a behavior, and to use this understanding to develop targeted interventions. In this lecture we will present the theory underlying current behavior guidance procedures with the goal of improving efficiency and efficacy of the use of these procedures in clinical practice. The audience will learn additional behavioral strategies via video demonstration of patient interactions and case presentations.

Upon completion of this course, attendees will be able to:

- Conduct a pre-appointment patient assessment to help customize the dental visit.
- Demonstrate an in-depth understanding of behavior and the current behavior guidance with extended knowledge from the behavioral sciences.
- Describe and utilize additional strategies to add to their behavior management tool box.

HERNANDEZ

Purnima Rathi Hernandez is a board certified pediatric dentist and behavior analyst who has been serving the communities of New York and New Jersey for over 25 years. Hernandez received her education in pediatric dentistry at Columbia University College of Dental Medicine. After serving as an assistant professor for many years in the department of pediatric dentistry she decided to pursue a career in the clinical practice of pediatric dentistry. In 2005 she established her own office in Fair Lawn, N.J. She then pursued a masters in Applied Behavior Analysis from Caldwell University, N.J. While she delivers care to all children, her special interests are treating children with special health care needs.

Hernandez is also a parent of a child with disabilities. She is an advocate not just for her child but other children in the community.

She has spoken to audiences on various topics related to disability such as health, advocacy, therapy, and special needs dentistry, and has authored and co-authored articles related to disability issues. She has served as council member on the Council of Developmental Disabilities in New Jersey and a board member Disability Rights New Jersey.

Hernandez was awarded the Dr Solomon Rosenstein Visiting Professorship and Fellowship by the Columbia University College of Dental Medicine for her contribution to the field of special needs dentistry. She was also awarded the Francis Black Humanitarian award in health care by Friends Health Connection, an award that recognizes individuals from New Jersey's health care facilities who are an extraordinary inspiration to others. Her areas of interest are working with special health care needs patients, behavioral disorders and phobias.

110. Does it Really Work? Minimal Intervention for Caries Management in Children (Including SDF, ITR/ART and Hall Technique) PD

Friday, May 22

9:30 AM – 12:30 PM

Jeanette MacLean, D.D.S., Yasmi Crystal, D.M.D., M.Sc.

Traditional operative treatment using different restorative materials, has been used for over a century to treat the dental destruction caused by dental caries. It is invasive, technique sensitive, costly, and requires significant cooperation from the patient. Many patients are unable to receive this treatment because they are too young, anxious, have medical conditions that limit their cooperation, or lack the resources to access care. The advent of new materials, concepts and products, have allowed the introduction of Minimal Intervention Approaches to manage caries lesions that allow us to give patients an alternative option. This presentation will discuss the use of Silver Diamine Fluoride, ITR/ART and the Hall Technique as Minimal Intervention Approaches in the management of caries in Pediatric Dentistry.

Upon completion of this course, attendees will be able to:

- Differentiate the concepts of minimally invasive dentistry, minimal intervention approaches and personalized optimal interventions understanding the needs and advantages of these approach.
- Understand the scientific basis for current recommendations for SDF, ITR/ART and the Hall Technique as well as their indications, pros and cons.
- Acquire the knowledge and techniques required to implement these approaches into clinical practice.

Sponsored by Elevate Oral Care

MACLEAN

Jeanette MacLean is a Diplomate of the American Board of Pediatric Dentistry, Fellow of the American Academy of Pediatric Dentistry, private practice owner, and mother of two. MacLean has become an internationally recognized advocate and expert on minimally invasive dentistry, appearing in newspapers, magazines, television, and continuing education lectures on this hot topic. Most notably, she was featured in the July 2016 New York Times article “A Cavity Fighting Liquid Helps Kids Avoid Dentists’ Drills,” which brought national attention to the option of treating cavities non-invasively with silver diamine fluoride.

CRYSTAL

Yasmi Crystal has a D.D.S. degree from Universidad Tecnologica de Mexico (UNITEC), D.M.D. from the University of Medicine and Dentistry of New Jersey (UMDNJ), pediatric dental specialty training from Eastman Dental Center, University of Rochester, and a M.Sc. in Clinical and Translational Research from CTSI, New York University, School of Medicine.

Founder and senior specialist at Comprehensive Pediatric Dentistry in New Jersey and clinical professor of pediatric dentistry at New York University, College of Dentistry, she is a Diplomate and an examiner for the written and oral sections of the American Board of Pediatric Dentistry, member of the Editorial Board of Pediatric Dentistry Journal and a spokesperson and past trustee of the AAPD; presently a member for the Council on Scientific Affairs, incoming president for the Pediatric Oral Health Research Group of the International Association of Dental Research and Fellow of the American Society for Dental Esthetics, the American College of Dentists and the International College of Dentists. Past member of the Board of Directors of the IAPD and Chair of their Scientific Committee. She is also a member of the editorial board of the Journal of the Latin American Society of Pediatric Dentistry (Revista ALOP) and a manuscript reviewer for several major journals including Pediatric Dentistry, JADA, IJPD and JOCPD. As leader in inter-professional relations, she has worked as Oral Health consultant, speaker and preceptor for the AAP, NJAAP, and is a faculty member for the Family Practice MD program at Somerset Medical Center, N.J., with her clinic being a rotation site for family practice MD residents. Crystal lectures to varied health care audiences in the US and abroad, and has published her research on numerous articles in peer reviewed scientific journals on topics of Caries Management, Risk Assessment and Minimal Intervention Approaches including SDF therapy.

120. There IS an “I” in Team! PD, DT

Friday, May 22

9:30 AM – 12:30 PM

Rosemary Bray, Speaker Trainer Consultant

We’ve all heard “There is NO I in TEAM”. Yes there is!! Come find out how that can be true. What a challenge it is to build a close knit, cohesive team from a mere group of individuals! And what a great difference there is between the two. We will discuss the principles of being great and the characteristics of highly effective teams. Hopefully we will be describing YOU!

Upon completion of this course, attendees will be able to:

- Learn what traits make a great or not-so great team.
- Understand how happy teams stay motivated and enjoy work more.
- Hear what helps to make some teams happy and cohesive and why others are not.

BRAY

Rosemary Bray spent more than 30 years employed in the dental profession, both in clinical and administrative roles, with experience in general dentistry, periodontics and her last 18 years in orthodontics all in San Diego. She left her quality fun orthodontic practice in late 1998 to begin her self-employment as a speaker and consultant in orthodontics and dentistry and she

proudly celebrated her 50th anniversary in teeth! YES that was 50 years! She has lectured and worked on every continent except Antarctica, on behalf of the AAO, several orthodontic companies, numerous state and local dental societies, Ortho and dental study groups and for her own workshops and seminars. She was very honored to have been the staff program chair for the AAO Annual Session in Chicago in 2011 and has been an AAO speaker for 26 consecutive years. She has spoken at many prestigious dental meetings as well, including the Hinman, Chicago Mid-Winter, Star of the North and of the South, Yankee, the ADA and CDA and the AAPD. Teeth have taken her around the world to teach. She has truly been there and done that in her orthodontic and dental career!

130. GSRA/Sunstar Research Fellowship Awards

Friday, May 22

8:30 – 11:30 AM

The GSRA award recipients will present their research and answer questions. The 2019-20 Sunstar Research Award Recipients will also present their research.

PD

140. Mini Clinics I

Friday, May 22

1:30 – 4:30 PM

1:30 – 2:15 PM

Role of the Pediatric Dentist in Sleep Disordered Breathing: Screening and Treatment Planning Made Easy

Audrey Yoon, D.D.S., M.S.

There is growing awareness of pediatric dentist's role about Sleep Disordered Breathing (SDB). This lecture will help you understand the various presentations of SDB and how to screen for children at risk. It will cover the treatment pathways including what pediatric dentist can do as an interdisciplinary team.

2:15 – 3 PM

CBD, Hemp Oil, and the Endocannabinoid System: Making Sense of it All

Philip Slonkosky, D.M.D., M.S.

As CBD continues to rise in popularity, it is important to understand some of the basics regarding the endocannabinoid system and its relationship to overall health, emerging areas of research related to dentistry, and how CBD interacts with the human body.

PD, DT

3 – 3:45 PM

The Diagnostic Challenge in Pediatric Dentistry Part VI

Juan Yepes, D.D.S., M.D., M.P.H., M.S., DrPH.

This presentation will bring three interesting patients that will bring a challenge for the practitioner. The format of the presentation will allow the audience to understand the importance of building a differential diagnosis and the implication in terms of treatment.

3:45 – 4:15 PM

Use of a Certified Therapy Dog in the Pediatric Dental Office

Jennifer Hechko, D.D.S., M.S.

Thinking about offering a therapy dog in the dental office? What will need to be considered? This presentation will talk about how to incorporate a therapy dog in a practice, the benefits to patients and staff, the financial aspects and the legalities. At the end, meet Balto, my therapy dog.

150. Recognizing the Need for Interceptiv Orthodontic Treatment & How to Steer Through the Timing, Planning and Delivery

PD

Friday, May 22

1:30 PM – 4:30 PM

Nagaar Sagafi, D.M.D., C.A.G.S.

This clinically oriented course will discuss, in a concise manner, some of the most critical factors involved in orthodontic planning process for the early mixed dentition to the adolescent dentition. Topics within this lecture will provide a foundation towards the thinking processes involved for the clinician in relation to inter-arch space analysis, intra-arch saggital and transverse relationship, and the identification of patient growth patterns in relation to their resultant future profile and occlusion. This will further enable the clinician to address, at each dental and developmental stage, factors such as habits, arch length shortage, holding of leeway space, intervention for crowded incisors, intervention for ectopic teeth, crossbites, surgical needs and adverse skeletal growth. All in all gaining the ability to answer parents questions regarding the immediate and/or future orthodontic needs of their child.

Upon completion, participants will be able to:

- Conduct space analysis at the time of incisor eruption in order to evaluate arch length/crowding, determine space maintenance and regaining needs, along with dos and don'ts, and appliances involved.
- Identify cross bites whether dental, functional or skeletal, and their respective solutions.
- Identify adverse vertical and saggital growth patterns.

- Identify orthopedic and orthodontic interventions that would improve function, esthetics and patient self-image.
- Educate the parents about your findings at various stages of their child's dental, skeletal and emotional development.
- To demonstrate an understanding of diagnosis and orthodontic treatment planning applying three key factors; lower arch crowding, bite depth and facial pattern.

SAGAFI

Negaar Sagafi was trained in Orthodontics & Dentofacial Orthopedics at Boston University Henry Goldman School of Dental Medicine under Dr. Anthony Gianelly. Since then she has treated thousands of cases simple and complex lead by a multi-disciplinary treatment planning approach. While in Boston, she served the North East Society of Orthodontist as co-chair of the scientific program and was on the board of Boston University Orthodontic Alumni Society for six years. In addition she served as part-time clinical faculty at Boston University Orthodontics Department from 2009-2015. She has lectured nationally and internationally on the latest techniques in orthodontics Dubai, Rome, N.Y., Sienna, and Boston. Currently, she maintains her private practices in Maryland and Washington, D.C. Sagafi is an active member of American Association of Orthodontists, Northeast Society of Orthodontists, and Mid-Atlantic Society of Orthodontists, District of Columbia Dental Society.

160. Dental Benefits Symposium

DT, PD

Friday, May 22

1:30 – 4:30 PM

Mary Essling, R.D.H., M.S., AAPD Director of Dental Benefit Program, Christine Taxin, Adjunct Professor, Owner & Speaker, Links 2 Success & Dental Medical Billing, Cynthia Kluck-Nygren, ADA Dental Team, Advocacy & Content Development Manager, Teresa Duncan, M.S., President of Odyssey Management, Inc.

Certain language found in many participating provider agreements can have unexpected consequences. Join Cynthia Kluck-Nygren to find out the real meaning of some of the legal terms found in many contracts and how that language can impact your patients and the success of your practice. The ADA and the AAPD have resources available to help.

Christine Taxin will discuss diagnostic coding. Its regular use remains elusive, but there is a small but growing number of dentists providing this information regularly when submitting claims.

Medical plans and clinicians have obtained and used diagnostic codes for approximately 20 years. They have helped plans develop guidelines and have become a critical element in research to determine best practices, preferred outcomes, decision support tools and efficient purchasing.

We will discuss the challenges and opportunities for dental plan use of diagnostic coding. It has the potential for significant impact on the direction, type, and availability of dental care as well as future plan design and payment mechanisms. Development of tools and techniques for obtaining broader use of diagnostic codes for billing medical plans for your patients treatment.

Today's pediatric practice relies upon a wide variety of codes for reimbursement. This session with Teresa Duncan will update you on recent coding additions as well as preview what's to come for 2021. We'll round it out by tackling top pediatric coding FAQs!

Upon completion, participants will be able to:

- Understand the real meaning of certain phrases common to many dental benefit contracts.
- Describe the language common to many EOBs and prepared to write letters of appeals to advocate on behalf of your patients.
- Know what resources are available through the ADA and AAPD and how proactively using them can safeguard your practice.
- Discover the tips to finding the highest level of diagnostic reasons for billing with a diagnostic code and how to back up that code with a information on why this patient is a medical necessity.
- The information needed to document medical necessity.
- Diagnostic codes come in batches. Learning how to find the correct one under the topic is key to payment.

ESSLING

Mary Essling is dental benefits director for the American Academy of Pediatric Dentistry. Essling has previous experience working on dental and medical procedure coding and third-party insurance matters for both the American Dental Association (from 1994 - 2002) and the American Society of Plastic Surgeons. She earned her Bachelor of Science degree from Marquette University and an M.S. in Health Law Policy from DePaul University. In addition, Essling is a licensed registered dental hygienist in Illinois, Indiana and Texas.

TAXIN

Christine Taxin is founder and president of Links 2 Success & Dental Medical Billing that covers all dental and medical billing training. Christine delivers continuing education seminars for dental and medical professionals and serves as an adjunct professor at the New York University (NYU) Dental School Resident Programs for New York City Programs, Harvard, and other dental schools across the country. Taxin has been awarded "Leader in Consulting" for the past eight years in Dentistry Today's list. Christine is on the board of Stem Cell Collection, the board of certification for 3D Scans and Fellowship with the AIDA. The AGD has approved her company Links

2 Success as a national provider of PACE continuing education credits. Taxin's workbooks "Introduction to Medical Billing," "Introduction to CT Scan Billing" and "Oral Surgery and Implant Surgery" have been received by many as the go to workbook for training. In 2020 she will be able to offer certification tests thru Q'Pro. The test is administered by the AMA and the courses are from the manuals that are on our web sites.

KLUCK-NYGREN

Cindy Kluck-Nygren is the manager, dental team, advocacy and content development in the American Dental Association's (ADA) Center for Dental Practice/Practice Institute. She has been with the ADA for six years and previously worked at the Academy of General Dentistry (twice), where her most recent position had been manager of government relations. In her current role, Kluck-Nygren manages the development of various practice management resources including online and print content such as articles, FAQs, and other member-facing materials. She supports the planning, development and delivery of both live and on-demand educational programs and represents the ADA at various dental association meetings. Her prior experience includes positions in marketing, shareholder and employee communications, and account management. She has a Bachelor of Arts degree in Communications from DePaul University, Chicago.

DUNCAN

Teresa Duncan addresses topics such as insurance coding and office manager training. Her memberships include the National Speakers Association and the National Association of Dental Plans. She has been named one of the Top 25 Women in Dentistry and is the author of *Moving Your Patients to Yes: Easy Insurance Conversations* as well as a contributing author

to the ADA's annual CDT Companion Guides. Her podcast "Nobody Told Me That!" provides regular coding and management updates. Teresa received her master's degree in health care management.

170. Challenging Conversations: How to Handle Non-Dental Topics in the Dental Chair PD, DT

Friday, May 22

1:30 - 4:30 PM

Patricia Braun, MD, MPH, Susan Fisher-Owens, M.D., M.P.H., F.A.A.P., Amanda Dempsey, M.D., Ph.D., M.P.H., Anupama Tate D.M.D., M.P.H.

The American Academy Pediatrics (AAP) Section on Oral Health Session is designed for all AAPD attendees and will address current challenging topics that come up in the dental chair. The Section on Oral Health will enhance pediatric dental professionals' knowledge of (1) Vaccine and Fluoride Hesitancy, (2) Human Papillomavirus (HPV) Prevention and Promotion, and (3) Current Hot Topic Issues in Pediatrics. The session will boost

communication skills and confidence for pediatric dentists and team members when addressing sensitive topics. There will be adequate opportunity for audience discussion. All AAPD attendees are invited to the session.

Upon completion of this course, attendees will be able to:

- Apply novel strategies to address parental concerns including vaccine and fluoride hesitancy to refusal. Using tools and interactive discussion, attendees will learn novel strategies to address parental concerns related to vaccine and fluoride hesitancy and refusal, while improving their own satisfaction with these difficult conversations.
- Promote personalized partnerships with parents in decision-making.
- Describe the current vaccine schedule and vaccine delivery challenges in the United States.
- Describe innovative approaches to vaccine delivery within and outside of the medical setting.
- Apply techniques that can be used in the dental office to discuss oral cancer prevention, HPV and other vaccine promotion.
- Promote vaccines in the dental office and connect back to the medical home to optimize vaccine delivery.
- Describe current hot topics in pediatrics relevant to pediatric dentists.
- Discuss interprofessional topics related to children and families.
- Promote interprofessional advocacy for children and families. Faculty will educate attendees on the latest hot topics in pediatrics that relate to pediatric dentists. Faculty will focus on opportunities to work inter-professionally to advocate for children.

BRAUN

Patty Braun is a professor of pediatrics, family medicine, public health and dental medicine at the University of Colorado where she conducts oral health disparity and health services research and program evaluation. She is the chair of the American Academy of Pediatrics Section of Oral Health Executive Committee and a past Santa Fe Group Fellow. She is also

the project director for the HRSA-funded Regional Oral Health Integration Network.

FISHER-OWENS

Susan Fisher-Owens is clinical professor of pediatrics at the UCSF School of Medicine and clinical professor of preventive and restorative dental sciences at the UCSF School of Dentistry, in San Francisco, Calif. Clinically, she works as a primary care pediatrician and faculty preceptor. She spends the remainder of her time serving as a children's oral health advocate and researcher, working with medical provid-

ers to increase their knowledge and interventions in oral health and with dental professionals to increase their understanding and application of contextual factors to care, and working with children. Her paper on “Influences on Children’s Oral Health: A Conceptual Model” has led to other work being conducted to investigate and reduce oral health disparities and improve care, and “Primary Teeth,” the clinical program she started to introduce oral health care into the pediatric practice setting was recognized with the Academic Pediatric Association’s Health Care Delivery Award in 2011. She serves on the American Academy of Pediatrics National Section on Oral Health.

DEMPSEY

Amanda Dempsey is tenured professor of pediatrics at the University of Colorado Denver, research director for pediatric hospital medicine at Children’s Hospital Colorado, and a senior faculty member of the Adult and Child Consortium for Outcomes Research and Dissemination Science (ACCORDS) program. She also directs the Surgical/Subspecialist Clinical Outcomes and Research (SCORE) fellowship. She has studied pediatric immunization delivery for the last 15 years. Her research interests include parental vaccine hesitancy, developing and assessing interventions to use of evidence-based interventions in primary care and, clinic- and community-based randomized clinical trials. She is on the board for directors for the Colorado Children’s Immunization Coalition, and also a member of the American Cancer Society’s HPV Roundtable Provider Intervention workgroup. She sees outpatient general pediatric patients of all ages in her clinical practice.

TATE

Anupama Rao Tate is an associate professor of pediatrics at the George Washington University School of Medicine. She is a faculty member in the Department of Pediatric Dentistry in the Goldberg Center for Community Pediatric Health at Children’s National Medical Center. She serves as the director of Advocacy and Research. She is director of the District of Columbia Pediatric Oral Health Coalition. She is a trustee and chairs the Grants and Programs Committee of Healthy Smiles, Healthy Children. She chairs the Consumer Review Committee of the AAPD. Currently she is the past president of the D.C. Chapter of the AAPD. She received her D.M.D. from Harvard School of Dental Medicine and her M.P.H. from Johns Hopkins Bloomberg School of Public Health. She received her certificate in pediatric dentistry from Children’s National Medical Center. She is involved in teaching, clinical practice, research and holds grants in community advocacy.

180. Creating a Culture of Accountability

PD, DT

Friday, May 22

1:30 PM – 4:30 PM

David Schwab, Ph.D.

The message may be “excellence” or “comprehensive dentistry.” It may be a message of “caring” or “compassion.” But if the team does not appreciate the message or have the skills to convey fundamental information to patients, then the practice’s core message is no more effective than a note stuffed in a bottle and thrown into the sea. The chances that the message will be received and acted upon in a timely manner are slim. This lecture gives practices the skills they need to develop and formulate messages and protocols and to hold everyone accountable for success. When the practice culture is about accountability, then things get done and results are achieved.

Upon completion, attendees will be able to:

- How to develop a core marketing message and communicate it effectively to patients.
- How to make everyone enthusiastically accountable for practice success.
- How to train the team to use the best verbal skills for any situation.

SCHWAB

David Schwab is a professional speaker, author, and consultant who helps dentists grow their practices, educate their patients, and train their teams so that the practices will be more profitable. An internationally known seminar speaker, Schwab presents practical, user-friendly practice management and marketing seminars for the entire dental team. Fast-paced, filled with humor, and overflowing with “pearls,” Schwab’s seminars are as popular as they are useful. His lecture topics include developing brand identity, effectively using social media, revving up internal marketing, improving verbal skills, providing team leadership, and increasing case acceptance.

As a consultant, Schwab works extensively with referral based practices to help dental specialists develop and maintain strong referral relationships. He helps specialists systematize referrals and develop outreach programs that attract more referral sources. Prior to starting his own company, Schwab served as director of marketing for the American Dental Association and as executive director of the American College of Prosthodontists. He has also worked with numerous dental schools, major corporations, and private dental practices.

At the present time he runs a marketing consulting firm, David Schwab & Associates, Inc. The company provides in-office seminars and consulting. Recognized as a prolific author, Schwab’s practice management and marketing articles have appeared in numerous publications, including the Journal of the American Dental Association, Dental Economics, the Seattle

Study Club Journal, and the Journal of the Canadian Dental Association. His website, www.davidschwab.com, features blogs, articles, and videos. Schwab holds a Ph.D. in English from Northwestern University. A native of New Orleans, he currently lives in the Orlando, Fla., area.

200. Coffee Clutch

DT

Saturday, May 23

(ticketed session)

8:30 – 11:30 AM

Moderators: Ann M. Bynum, D.D.S., Robert D. Elliott, D.M.D., M.S.

Real-world scenarios we encounter every day in our offices will be presented and discussed at each break-out table. Spend the morning with your peers discussing key issues that come up in your office every day. This is a group effort, audience driven and fully interactive program for all team members!

Upon completion, attendees will be able to:

- Understand how other offices handle similar issues.
- Share in the participation of challenges your office may have encountered.
- Support and network with difficult patients and parents.

Please have your staff sign up during registration so we can plan accordingly. There is no fee for this course, but tickets are required.

210. MiniClinics II

PD, DT

Saturday, May 23

8:30 – 11:30 AM

8:30 – 9:15 AM

Soft Tissue CO2 Laser Surgery for the Pediatric Dental Patient from Birth through Adolescent from Suck Swallow Breath Through Sleep Disordered Breathing
Martin Kaplan, D.M.D.

The presentation will provide clinical case histories in pediatric dentistry from infant frenum and feeding through speech-swallowing-sleep disordered breathing, laryngomalacia, ADHD, oral soft tissue biopsy, space maintainers, and interceptive orthodontics. The practitioners will come away with a greater knowledge of how CO2 laser dentistry can help his practice.

9:15 – 10 AM

Social Media Marketing for the Pediatric Dental Office

Jarod Johnson, D.D.S.

While most offices are open throughout the week; patients and potential customers are looking for answers outside of business hours. During these hours a website and social media presence are valuable assets to provide education and information. This lecture focuses on strategies to engage current and potential patients.

10 – 10:45 AM

Breathe Well, Little One: Pediatric Airway from Cradle to Commencement

Susan Maples, D.D.S., M.S.B.A.

Approximately 25 percent of adults have sleep related breathing disorders such as UARS and OSA and they're mostly preventable. Learn to recognize risk factors and the progression of breathing disorders, and how to improve a child's health trajectory. Bring your team and leave with new inspiration for a pediatric airway practice.

10:45 – 11:30 AM

Scaling Greatness- The Importance of Great Leadership

Oshmi Dutta, B.D.S., D.D.S., M.S., FRCD(C).

What makes a leader great? The ability to find a balance between foresight, performance, and character. The vision, focus, courage and integrity. The ability to plan strategically and catalyze cooperation amongst their team while being confident and humble. Let us explore great leadership in all of us!

220. Identification and Management of Opioid and Substance Use Disorders in Pediatric Dental Practice

PD, DT

Saturday, May 23

8:30 – 11:30 AM

Randy Lout, D.D.S., M.S.,

This lecture will discuss common drugs abused by children and adolescents, and provide the attendee with approaches in identifying and managing patients with substance and opioid use disorders in the pediatric dental practice. Logic for using, signs, symptoms, behaviors, and effects on the developing brain will be highlighted. Dental treatment recommendations, brief interventions, effective referral protocol, and resources for family members will be discussed.

Upon completion, attendees will be able to:

- Describe alcohol and drug use in early adolescence with progression to substance and opioid use disorders in late adolescence.
- Discuss the neurocognitive effects of addictive substances on the developing adolescent brain.
- Discuss patterns, trends, epidemiology, and contributing factors to opioid and other substance use \ abuse among the child and adolescent population.
- Highlight similarities, differences, and discuss challenges of adolescents with co-occurring substance use and psychiatric disorders.
- Discuss how the pediatric dental practitioner and staff can identify and manage substance use and withdrawal syndrome behaviors in patients.
- Recognize and deliver safe dental procedures for children and adolescents who are actively using alcohol and \ or other drugs; or are currently receiving treatment for substance and opioid use disorders.
- Demonstrate and provide the pediatric dentist with brief interventions, referrals and resources for the family.

LOUT

Randy Lout attended Oklahoma State University and Southwestern Oklahoma State University School of Pharmacy. He received his Doctor of Dental Surgery degree from University of Oklahoma College of Dentistry. After dental school, he completed his pediatric dental residency and Master of Science degree at the University of Minnesota. As part of his residency, his hospital training was at the University of Minnesota Hospitals and Hennepin County Medical Center. Following his training, he was awarded the Graduate Student Research Award by the American Academy of Pediatric Dentistry. Pursuing further education later in life, he completed a Master of Science in Addiction Counseling program at Grand Canyon University followed by licensure in substance abuse counseling. Lout is a Diplomate, American Board of Pediatric Dentistry and a Fellow, American Academy of Pediatric Dentistry. He has served on several committees of the American Academy of Pediatric Dentistry and is currently Chair, Council on Clinical Affairs. Lout is in private practice in Phoenix and Mesa, Ariz.

Evidence-Based Dentistry Workshop PD

Saturday, May 23

8:30 AM – 5 PM

Cost: \$250

Peter H. Buschang, Ph.D., James Coll, M.D.

Following an introduction to evidence-based dentistry, the attendees will learn how to use the Evidence Based Hierarchy

to classify studies based on their designs. They will then be familiarized with the Cochran reviews and Centre for Evidence Based Dentistry, important resources that clinicians use to stay informed. Basic elements of PubMed will then be introduced and applied to provide the attendees with the computer skills necessary to perform literature searches. In order to facilitate the literature searches, the attendees will learn how to develop questions using the PICO (population, intervention, comparator and outcomes) format. Finally, basic and practical information pertaining to research methodology will be introduced – along with a specially designed checklist – and later used by the attendees to critically evaluate and rank published research studies according to the strength of evidence they provide and learn how Clinical Practice Guidelines of the AAPD are created from evidenced based research.

Upon completion, attendees will be able to:

- Understand why an evidence-based approach is necessary.
- Be able to develop research questions and perform literature searches on the internet.
- Use evidence-based methods to evaluate the scientific literature and use critical appraisal skills to scrutinize and assign articles to different levels of evidence.

BUSCHANG

Peter Buschang is regents professor of orthodontics and director of orthodontic research at Baylor College of Dentistry. He received his Ph.D. in from the University of Texas at Austin in 1980. From 1980-1983, he was a NIDR postdoctoral fellow in the Department of Orthodontics, University of Connecticut Health Science Center. From 1983-1988, he was a FRSQ scholar in the orthodontic section and Human Growth Research Center, University of Montreal. He regularly reviews articles for numerous journals and has served as associate editor for several journals (currently Angle Orthodontist). Dr. Buschang has published over 300 peer-reviewed articles and book chapters focusing on craniofacial growth, developmental adaptations associated with treatments and oral-motor function. He is director of the graduate core course entitled “Research Design and Methodology.”

COLL

James Coll is a diplomate of the American Board of Pediatric Dentistry and has been in private practice for 39 years. He has published numerous articles on primary tooth pulp therapy, and is a member of the editorial board and section editor for pulp therapy for *Pediatric Dentistry*. He is the first author of AAPD’s first-ever evidence-based dentistry systematic review: Systematic review and meta-analysis of vital pulp therapy for children with deep caries in the primary dentition.

230. Early Career Dentist Course

PD

Saturday, May 23

12:30 – 3 PM

This fast-paced, interactive session allows YOU to select the topics that mean the most to you. Personalize this course with your questions to the presenters and get the most out of this intimate setting. Attendees will rotate every 30 minutes to a different station. Hear from the best pediatric dentistry has to offer!

Bobby Thikkurissy – Matching Child Temperament and Sedation Regimen

Cathy Flaitz – Common Oral Pathologies

Angel Stout – Child Abuse and Neglect

Paul Bahn – Lasers and Tongue Ties

Martha Ann Keels – Hot Messes: Dental Erosion and Causes

Jed Best – Technology in the Pediatric Dental Office

Jade Miller – Having Difficult Conversations with Staff

LaRee Johnson – Balancing Work and Life

Josh Miller (Treloar and Heisel) – Retirement Planning and Planning for the Future

Upon completion, attendees will be able to:

- Describe the differences between hypomineralized and unaffected permanent molars.
- Recognize the presence of a hypomineralized molar as a potential predictor for dental anxiety.
- Plan a strategy to adequately anesthetize a severely hypomineralized molar.

3RD MOLARS & ORTHODONTIC TREATMENT, FRIEND OR FOE?

Nagaar Sagafi, D.M.D., C.A.G.S.

This session will present and discuss the role of third molars in orthodontic treatment, and the fact that in some cases, they can influence the latter or be influenced by it, speaks of their direct involvement in treatment planning. The principle issues investigated throughout literature concerning the third molars in relation to orthodontic treatment have been the possibility of their eruption or impaction related to genetically predetermined factors, possibility of their presence leading to impaction of second molars in some cases, and the possible consequence of orthodontic treatment extractions or on the contrary distalization therapy in their eruption ability or influencing potential impaction. Lastly their influence in orthodontic post-treatment mandibular incisor relapse will be discussed in this session.

Upon completion, attendees will be able to:

- Demonstrate a clear understanding of involvement of 3rd molars in orthodontic treatment and their influence on each other.
- Describe factors that effect eruption or impaction of 3rd molars.
- Explain incisor alignment relapse post-orthodontic treatment in relation to 3rd molars.

240. Speed Learning: Back to Basics: 3rd Molars, Peg Laterals & Molar Hypomineralization

PD

Saturday, May 23

1:30 – 4:30 PM

MOLAR HYPOMINERALIZATION

Brandon Schwindt, D.M.D.

A routine exam that discovers a sensitive, brown, crumbling and carious first permanent molar in a previously asymptomatic 6-year-old is a challenging clinical scenario for the doctor and patient alike. Can I get this tooth numb enough? Will the restoration hold? Should I seal the remaining grooves? Is a permanent stainless steel crown the best solution? What about or extraction? Turns out, that the current literature gives us pediatric dentists evidence-based guidance on how to set up these teeth, and ultimately the patients, for long term success. This lecture will take a deep dive in to the composition of the hypomineralized molar. We will also be describing different strategies for restoring these teeth with a focus on sensitivity reduction and long-term preservation of enamel.

SCHWINDT

Brandon Schwindt completed his undergraduate degree at the University of Oregon. He graduated from Oregon Health and Sciences Dental School and completed a Pediatric Dentistry Residency at the Medical University of South Carolina under Dr. Ron Bell. He is a diplomate of the ABPD and currently holds the position of president elect of the College

of Diplomates of the American Board of Pediatric Dentistry. He served on Oregon's Board of Dental Examiners from 2009 to 2017, serving as the Oregon State Dental Board president in 2015. Schwindt was appointed to the Oregon Dental Board's Anesthesia Committee where he has continued to serve since 2007. He practices full time with his wife, Dr. Kathryn Bowman, in their pediatric practice in Portland, Ore.

SAGAFI

Negaar Sagafi was trained in orthodontics and dentofacial orthopedics at Boston University Henry Goldman School of Dental Medicine under Dr. Anthony Gianelly. Since then she has treated thousands of cases simple and complex lead by a multi-disciplinary treatment planning approach. While in Boston, she served the North East Society of Orthodontists as co-chair of the

scientific program and was on the board of Boston University Orthodontic Alumni Society for six years. In addition she served as part-time clinical faculty at Boston University Orthodontics Department from 2009-2015. She has lectured nationally and internationally on the latest techniques in orthodontics Dubai, Rome, N.Y., Sienna, and Boston. Currently, she maintains her private practices in Maryland and Washington, D.C. Sagafi is an active member of American Association of Orthodontists, Northeast Society of Orthodontists, and Mid-Atlantic Society of Orthodontists, District of Columbia Dental Society.

250. Sedation Safety in Pediatric Dentistry PD, DT

Saturday, May 23

1:30 – 4:30 PM

Steve Yun, M.D.

This course teaches sedation safety principles by analyzing mistakes from actual malpractice cases. Yun is universally regarded as a dynamic, compelling speaker who also uses powerful analogies from cognitive psychology, aviation safety, and other related fields to tell dramatic stories that listeners will not only remember, but use in practical ways in their office practice to improve patient safety.

Upon completion, attendees will be able to:

- Demonstrate basic and advanced airway skills for the pediatric patient.
- Describe common cognitive and technical errors that can lead to adverse sedation outcomes in pediatric patients.
- List simple, but powerful and practical strategies and techniques to prevent sedation complications in pediatric patients.

YUN

Steve Yun is a board-certified anesthesiologist who specializes in office and dental anesthesia. He obtained his M.D. from the University of Southern California, and completed his post-graduate training at the UCLA Center for Health Sciences. He is a lecturer at the Loma Linda University School of Dentistry, clinical professor at the Western University of Health

Sciences, and an expert consultant and examiner for the Dental Board of California. He is also a safety inspector for the American Association for the Accreditation of Ambulatory Surgical Facilities (AAAASF). He has extensive clinical research experience and has given numerous lectures across the country and internationally on patient safety issues.

Sponsored by Sedation Resource

260. Wellness Session PD, DT, S

Saturday, May 23

1:30 – 4:30 PM

Erin Oprea, Celebrity Fitness Trainer, Kaitlyn Kownacki, R.D.N, Nutrition Therapist, Amy Lynn Green, LCSW, ERYT

Keeping your mind, body, and soul healthy is a key part to being successful at both work and home! Attend this three-part wellness session from leading local experts in their fields of fitness, nutrition, and mindfulness. Join fitness trainer to the celebs, Erin Oprea, for an hour of fitness focused Q&A. Oprea will answer hard-hitting questions to inspire and motivate attendees to add movement into their lives. In the next hour, join nutrition expert, Kaitlyn Kownacki, to learn how to redefine the wellness buzz-

word using scientifically proven insights and data. Discover how to make confident choices in what to eat, when to eat, and how to eat. Learn where unhelpful dietary rules and trends come from, how they hold their power, and ways to take steps toward breaking free from them. The last hour of this session will focus on mindfulness with Any Lynn Green. This hour is designed to educate attendees on managing daily stress, making small behavior changes, and incorporating simple relaxation techniques. Learn from the expert: stress management and mindfulness, the neurobiology behind mindfulness, transforming sleep with meditation/mindfulness, and practical self-care using mindfulness/meditation.

Upon completion, attendees will be able to:

- Discover how to make confident choices in what to eat, when to eat, and how to eat.
- Autonomy in an advice era---everyone is an expert, so how do you know what's true?
- Mindfulness and neurophysiology (the neurobiology behind mindfulness)
- Resiliency and mindfulness/meditation
- Transforming sleep with meditation/mindfulness
- Practical self-care using mindfulness/meditation

OPREA

With celebrity clients like Carrie Underwood, Maren Morris and Kasey Musgraves, **Erin Oprea** has earned the title of “personal fitness guru” given to her by The Huffington Report. With her military background, Erin uses her unique fitness and nutrition plan to train the most elite group of clients.

KOWNACKI

Kaitlyn Kownacki is a Registered Dietitian (RDN) and Nutrition Therapist. She partners with clients to achieve their authentic health, taking into account both the external world of nutrition science and also individuals’ internal cues, intuition, and emotional well-being. Kownacki works with a diverse array of people, including those with GI conditions such

as Inflammatory Bowel Disease (IBD), Irritable Bowel Syndrome (IBS), people with cancer and cancer survivors, clients looking to improve their heart health, and those looking to incorporate more plant-based eating. Her approach includes Health at Every Size (HAES) and Intuitive Eating principles. Originally from New York, Kownacki first came to Nashville to attend Vanderbilt University to earn her Bachelor of Science degree. She attended Lipscomb University to complete her postgraduate studies in dietetics. Kownacki comes from a health coaching background, which she incorporates in her work with clients. She also uses her past experience as a personal chef to make flavor and enjoyment a fundamental factor when choosing foods.

GREEN

Amy Lynn Green is the founder and executive director of The Rooted Bridge, owner and founder of Nashville Collaborative Counseling Center, and is dedicated to increasing access and affordability to mental health support for parents to be and parents across the Southeast region. She believes that collaboration in care is a vital aspect to providing support to families.

Green received her M.S.W. from the University at Buffalo with a concentration in trauma informed care and human rights, a certificate from the University of Massachusetts in Integrated Care Management, as well as a certificate in maternal mental health. Green works with women and their families, facilitates healing after trauma, supports parents through loss/infertility, and ensures that parents and children have a team collaborating with them in care during pregnancy and into parenthood. She is an adjunct at the University of Tennessee Masters in Social Work program, and has given multiple trainings on Maternal Mental Healthcare. Green is the mother to three angel babies and one earthside daughter, Kinley.

270. International Oral Presentations

PD, DT, S

Saturday, May 23

1:30 – 4:30 PM

Are you interested in what’s happening globally with pediatric dentistry? Attend this session and hear from experienced international pediatric dentists. Check the AAPD 2020 website in March for further topic & speaker details.

Learning Labs II

PD, DT

Saturday, May 23

These informal, small, hour-long group settings encourage interaction between the speaker and the attendees. Snacks and beverages are included in the ticket price, \$50. Register for Learning Lab sessions during registration; they may be sold out on-site.

8 – 9 AM

LL 09 Esthetic Restorative Options for Primary Anterior Teeth with Caries

Patrice Wunsch, D.D.S., M.S.

Presentation will explore the diagnosis of anterior teeth with superficial or deep carious lesions and treatment planning based on patient age, behavior and parental concerns. Various treatment strategies and techniques will be discussed and when to treat the patient in a clinical setting, under conscious sedation or under general anesthesia.

9:10 – 10:10 AM

LL 10 Use of Teledentistry to Enhance Your Practice
Sean McLaren, D.D.S.

We will go over a brief history of our teledentistry collaboration and offer some suggestions as to how to implement a program in your office to potentially increase referrals from other providers and or clinics that need a pediatric dentist.

10:20 – 11:20 AM

LL 11 Essential Insurance, Investment, and Planning Strategies for Pediatric Dentists
Josh Miller, AIF

Identify personal and business insurance plies important to risk management protection. Discuss investment risk tolerance and its role in portfolio design as well as qualified and non-qualified investment accounts available to create wealth. Understand the importance of setting goals, implementing strategies, and following a well-designed plan to reach financial independence.

11:30 AM – 12:30 PM

LL 12 How To Grow An Authentic, Engaged Community on Instagram
Jeff Karp, D.M.D., M.S.

Instagram is an amazing social media platform for sharing your creativity, marketing your practice, and building community around your professional and personal interests. In this 1 hour learning lab, Dr. Karp, a pediatric dentist, photographer, and daily Instagram user, shares how he grew an international following on the platform.

12:40 – 1:40 PM

LL 13 How to Mocha Light Frappuccino Your Dental Practice: Customer Service Insights
Julie Fitzpatrick, Practice Administrator

In this presentation, Practice Administrator Julie Fitzpatrick and Pediatric Dentist Kristine Grazioso, DMD explore the Starbucks phenomena. Based upon the work written in *The Starbucks Experience* by Joseph Michelli, PhD, we examine the 5 Principles for Turning Ordinary into Extraordinary. Each concept is tied back to actionable recommendations for practices.

1:50 – 2:50 PM

LL 14 Soft Tissue Laser Use for Pediatric Dentistry Procedures
Vijay Mathur, B.D.S., M.D.S.

There are several misconceptions about soft tissue laser use for pulp application. In this learning lab I would like to give practical tips and show many of my cases on how I did pulp related procedures and minor surgeries in pediatric patients with minimal pain and needing local aesthetic shots.

3 – 4 PM

LL 15 The Recipe of a Great Policy and Procedure Manual
Robert Elliott, D.M.D., M.S., F.A.A.P.D.

What makes up a great Policy and Procedure Manual to protect both the employee as well as the Practice? We will review the details and topics of what is considered one of the most important documents for every office to have and implement.

4:10 – 5:10 PM

LL 16 Cannabidiol (CBD) Oil and Pediatric Dentistry
Paul Bahn, D.M.D.

The presentation will provide a broad overview of the cannabinoid system and the use of CBD oils in the pediatric population. It will discuss the primary medical uses for CBD oil. Finally, a discussion of the pharmacological considerations for CBD oil with a potential sedation patient.

**300. String of Pearls**
Sunday, May 24**PD, DT**

8:30 – 11:30 AM

8:30 – 8:45 AM

Airway Rescue and Management in Pediatric Sedation
Steve Yun, M.D.

This lecture will focus on simple, practical techniques and strategies that the dental practitioner can utilize to safely manage the pediatric airway and emergency rescue skills. A simpler, more powerful airway algorithm (the airway vortex model) will also help the audience be better prepared to handle pediatric airway emergencies.

8:45 – 9 AM

Childhood Cancer Survivors Oral Health Considerations*Katerina Kavvadia, D.D.S., MDent Sc, Ph.D.*

Childhood cancer survivors often present with tooth development aberrations either in the root or the crown, attributed to chemotherapy and/or radiotherapy during active tooth development. The aim of this presentation is to discuss such aberrations as well as their implication for the patients future oral health, through reviewing series of clinical cases and presenting results of relevant systematic reviews.

9 – 9:15 AM

Sequel of Early Age Trauma to Anterior Region: Interesting Findings*Vijay P. Mathur, B.D.S., M.D.S.*

Trauma to anterior maxilla before age of four years may result in several effects on erupting permanent buds. This presentation will describe some of the interesting clinical findings as a case series.

9:15 – 9:30 am

Ergonomics and Optics for Pediatric Dentists
Bryan Skar, D.D.S.

Practitioner health and wellness are increasing in the consciousness of the provider community. By identifying and correcting improper posture and other ergonomic shortcomings the dental provider can decrease occupational pain, fatigue and burnout. Providers who care for themselves are in a better position to serve their patients, families and communities.

9:30 – 9:45 AM

Fantastic Firsts-Making the Most of the First Visit with Oral Health and Wellness
Lavanya Venkateswaran, D.D.S.

The first visit for patients at your office provides a unique opportunity to connect with parents and understand the family's oral health attitudes and lifestyle. This presentation highlights key points to emphasize with parents to maximize preventive oral health and make oral wellness a priority in their child's life.

9:45 – 10 AM

Management of Maxillary Space Loss using the Pendulum Appliance
David M. Avenetti, D.D.S., M.S.D., M.P.H.

The pendulum appliance is a cost-effective solution for many patients. This session will describe the causes and effects of unilateral/bilateral space loss in the maxilla; describe the design and biomechanics of the pendulum appliance to regain space; and describe the integration of an expansion screw when expansion is needed.

10 – 10:15 AM

Myofunctional Therapy: The Game Changer and the Missing Link in a Pediatric Dental Practice
Navreet K. Sidhu, D.D.S.

Early recognition and treatment of deleterious oral habits is essential for oral facial development. Therefore, thorough myofunctional evaluation should be a key element of the initial patient encounter. It is imperative that the pediatric dentist possess the skills to address oral dysfunction.

10:15 – 10:30 AM

Preventing Prolonged General Anesthesia in Very Young Patients
Brett T. Chiquet, D.D.S., Ph.D.

In December 2016, the U.S. Food and Drug Administration issued a Drug Safety Communication cautioning against prolonged use (three or more hours) of general anesthetic and sedation drugs in children under the age of three. Events leading to prolonged anesthesia in pediatric dentistry cases will be discussed

10:30 – 10:45 AM

Chalky Teeth in Children - A View from 'Downunder'
Mala Desai, B.D.Sc., M.D.Sc., Grad Dip Clin Dent

Developmental dental defects (D3) pose a significant challenge to clinicians worldwide. Clinical cases and experiences managing children with chalky teeth will be presented. Furthermore, research findings and valuable online resources from the "Chalky Teeth Campaign", an initiative from D3 Group downunder will be shared.

10:45 – 11 AM

SDF and Zirconia: Esthetic Solutions for Non-Esthetic Caries Arrest
Dustin S. Janssen, D.D.S.

Silver Diamine Fluoride (SDF) has radically changed the methodology with which we can practice pediatric dentistry. However, this is often off-putting because of the poor esthetic results. In this presentation we will demonstrate the steps to arrest carious lesions with SDF while offering a long lasting esthetic result.

11 – 11:15 am

Resin Infiltration for Interproximal and Smooth Surface Lesions
Carla E. Cohn, D.M.D.

Using resin infiltration since its introduction in North America ten years ago, I have infiltrated countless incipienties, white spot lesions, molar incisor hypomineralized teeth, fluorosis and select enamel defects. Technique, indications and application of this unique minimally invasive product will be presented along with clinical cases.

11:15 – 11:30 am

Restoring without Drilling: Paradigm Shift in Dentistry for Children
Fouad S. Salama, B.D.S.

The purpose of this presentation is to give an overview of the newest caries management procedures without drilling as well as caries control in the dental practice with emphasis on the pros and cons of different approaches, which should be considered carefully to make a sensible decision using evidence-based guidelines.

310. Sores and Bumps 101 PD

Sunday, May 24

8:30 – 11:30 AM

Juan Yepes, D.D.S., M.D., M.P.H., M.S., DrP.H.

This three hour lecture will use real patients that can walk at any time and at any pediatric dental practice in the country with issues unrelated with teeth. Issues such as change in the color of the oral mucosa or gums, small sores in the lower lip, well defined patches on the dorsum of the tongue, generalized sore gums, bad taste, halitosis, bumps in the floor of the mouth, etc. Please, come to this Sunday morning lecture with a lot of energy and your mobile device to participate in questions developed for each patient. The lecture is practical and will cover common issues that the pediatric dentist will face in a busy practice.

Upon completion of this course, attendees will be able to:

- Establish a differential diagnosis for the most common soft tissue issues that can present in the oral cavity of children.
- Discuss the basis for the treatment of the most common soft tissue issues that can present in the oral cavity of children.
- Understand the reasons and criteria for referral of children with soft tissues issues in the oral cavity.

YEPES

Juan F. Yepes is an associate professor in the Department of Pediatric Dentistry at Indiana University School of Dentistry in Indianapolis, Indiana. Yepes is also an academic scholar at the Department of Pediatric and Community Dentistry, University at Buffalo.

Yepes is a dentist and a physician from Javeriana University at Bogota, Colombia. In 1999, Yepes moved to the USA and attended the University of Iowa and the University of Pennsylvania where he completed a fellowship and residency in Oral and Maxillofacial Radiology and Oral Medicine respectively in 2002 and 2004. In 2006, he completed a Master in Public Health, and in 2011 a Doctoral Degree in Public Health both with emphasis in epidemiology at the University of Kentucky College of Public Health. In 2008, Yepes completed a residency program in Dental Public Health at University of Texas A&M. Finally, he completed the residency program and Masters of Science degree in pediatric dentistry at the University of Kentucky in 2012.

Yepes is Diplomate of the American Board of Oral Medicine, American Board of Dental Public Health, and American Board of Pediatric Dentistry. Yepes was the section head of oral and maxillofacial radiology at the University of Kentucky for six years. He is an active member of the American Academy of Pediatric Dentistry, American Academy of Oral Medicine, American Academy of Oral and Maxillofacial Radiology, and American Dental Association. Yepes is a fellow in dental surgery from the Royal College of Surgeons at Edinburgh, Scotland. He is in the editorial board of Oral Surgery, Oral Medicine, Oral Pathology, Oral Radiology. His research and teaching interest are in the area of radiation safety, oral medicine, oral radiology and oral pathology in children.

Social & Networking Events

Early Career Dentist Happy Hour: FGL House*

Thursday, May 21

6 – 8 PM

Sponsored by *Treloar & Heisel and Medical Protective*

AAPD Welcome Reception: A Night in Music City USA*

Friday, May 22

7 – 10 PM

WildHorse Saloon & George Jones Museum

Break out your cowboy boots and don't forget your hat! Get ready to walk down to Broadway – the Heart of Nashville, as AAPD welcomes you to the 2020 Welcome Reception at George Jones and the iconic Wildhorse Saloon. Enjoy the best food that Music City USA has to offer. Learn how to perfect your two-step with lessons at the Wildhorse Saloon accompanied by a great Nashville band. Head next door to George Jones and explore the rooftop while enjoying Nashville bites and a drink. Check out the museum dedicated to the Legend himself, Mr. George Jones. Local live acts grace the small stages on each level, and you might even find your big break! Feeling bold? Live band karaoke is waiting for you to seize your moment and become the next big thing in country!

Career Fair

Saturday, May 23

3 – 5 PM

The Career Fair is a great opportunity for a new pediatric dentist seeking their first practice position or the more experienced dentist who is looking for a change to network with hiring organizations. New this year, AAPD will be providing a hosted bar for all those who attend!

For more information on exhibiting or to download the Career Fair form, visit <http://annual.aapd.org/networking/>. The cost for AAPD Members is \$150; recruitment companies may exhibit at the price of \$500.

PAC Donor Reception

AAPD PAC
THE BIG ADVOCATE for little teeth

Friday, May 22

4 – 5 PM

(Invitation only)

Military and Public Health Services Reception

Saturday, May 23

5 – 6 PM

International Reception

Saturday, May 23

5:30 – 7:30 PM

This reception began in 2010 at the Annual Session and has continued to be a popular event for international members and attendees. Join members of the AAPD board of trustees, learn more about the AAPD and network with fellow international attendees before enjoying your evening in Nashville.

President's Farewell Dinner*

Sunday, May 24

6:30 – 10:30 PM

Country Music Hall of Fame

Minnie Pearl said it best when she declared, "How-dee! I'm just so proud to be here!" And boy will you feel the same!

Tonight we "Honor Thy Music" in the home of Country Music History. And what better way to celebrate America's Music than by an immersive entertainment experience. Guests will have the chance to roam the halls of the "Smithsonian of Country Music" with endless exhibits focused on the History of Country Music, and various exhibits dedicated to individual artists and their accomplishments. Once seated, you'll go through the ages of Country Music with surprise performances by some of the Genre's most revered artists and icons. Promenade your partner or be a rhinestone cowboy from the Waltz to the Two Step right into the post dinner dance party with Boogie Woogie Nashville country has never known. Reception is sponsored by *Treloar & Heisel*

*Ticketed Events

New Dentist Happy Hour, Welcome Reception and President's Farewell Dinner are ticketed events. Tickets must be purchased in advance when registering to attend AAPD 2020.

Additional Courses & Workshops

BLS Skills Check

PD, DT

Friday, May 22

9 – 10 AM

Saturday, May 23

8 – 9 AM & 1 – 2 PM

Cost: \$50

PART 2 HANDS-ON

The AAPD will be offering **Part 2 only** of the HeartCode BLS course. This is the hands-on testing requirement of the HeartCode BLS course. After completing the online portion, students attend a structured BLS Hands-On Session with an AHA Instructor. This session focuses on meaningful skills practice, debriefing, team scenarios, discussions of local protocols, and skills testing. Students must bring their certificate of completion from the online class to the BLS Skills Check.

*Part 1 HeartCode BLS Online Class: **NOT OFFERED BY AAPD.***

Students will first take the BLS class online from the American Heart Association. HeartCode BLS uses a variety of eLearning assets such as dramatizations, eSimulations, animations, self-directed learning, and interactive activities to teach students BLS knowledge and skills. Students will take the online class from www.onlineaha.org and bring their certificate of completion to the BLS Skills Check held at the conference. The fee for Part 1 (the online class) is the responsibility of the student.

BLS ONLINE CLASS: Visit www.onlineaha.org to register

***Register for both BLS and PALS and save on a combination cost of \$145.**

PALS Skills Check

PD, DT

Friday, May 22

10 AM – 1 PM

Saturday, May 23

9 AM – NOON & 2 – 5 PM

Maximum Participants: 35

Cost: \$100

PART 2 HANDS-ON

The AAPD will be offering **Part 2 only** of the HeartCode PALS course. This is the hands-on testing requirement of the HeartCode PALS course. Students will demonstrate the skills they have learned in the online class including: one and two person infant and child CPR, rescue breathing, and fluid bolus administration. Students must bring their certificate of completion from the online class to the PALS Skills Check. In this environment, students apply their knowledge to real-time decision-making and skills development. Debriefings and coaching are provided immediately after each simulation to facilitate learning about pediatric advanced life support.

*Part 1 HeartCode PALS Online Class: **NOT OFFERED BY AAPD.** This is a web-based, self-directed program that teaches healthcare providers knowledge and skills needed to recognize and prevent cardiopulmonary arrest in infants and children. Students will take the online class from www.onlineaha.org and bring their certificate of completion to the PALS Skills Check held at the conference. The fee for Part 1 (the online class) is the responsibility of the student.*

PALS ONLINE CLASS: Visit www.onlineaha.org to register

Esthetics for the Pediatric Patients: A Well-Solved Problem Symposium

Saturday, May 23

7 – 8:30

Stay tuned for more information coming soon!

Sponsored by 3M

Evidence-Based Dentistry Workshop PD

Saturday, May 23

8:30 AM – 5 PM

Peter H. Buschang, Ph.D. and Jim Coll, D.D.S., M.S.

Maximum Participants: 20

Cost: \$250

Following an introduction to evidence-based dentistry, the attendees will learn how to use the Evidence Based Hierarchy to classify studies based on their designs. They will then be familiarized with the Cochran reviews and Centre for Evidence Based Dentistry, important resources that clinicians use to stay informed. Basic elements of PubMed will then be introduced and applied to provide the attendees with the computer skills necessary to perform literature searches. In order to facilitate the literature searches, the attendees will learn how to develop questions using the PICO (population, intervention, comparator and outcomes) format. Finally, basic and practical information pertaining to research methodology will be introduced – along with a specially designed checklist – and later used by the attendees to critically evaluate and rank published research studies according to the strength of evidence they provide and learn how Clinical Practice Guidelines of the AAPD are created from evidenced based research.

Upon completion, attendees will be able to:

- Understand why an evidence-based approach is necessary.
- Be able to develop research questions and perform literature searches on the internet.
- Use evidence-based methods to evaluate the scientific literature and use critical appraisal skills to scrutinize and assign articles to different levels of evidence.

Research, Poster Presentations & Awards

My Kid's Dentists and Orthodontics Research Poster Competition

Friday, May 22 and Saturday, May 23
FRIDAY 9 AM – 5 PM · SATURDAY 9 AM – 5 PM

My Kid's Dentist and Orthodontics Poster Research Competition is available in the Exhibit Hall. Different topics are presented each hour. Stop by to meet the authors and discuss their presentations with them! A Poster OnDemand Stations is available in the area for attendees to view the ePosters at any time.

Sponsored by My Kid's Dentist and Orthodontics

130. Graduate Student Research Awards (GSRA) and Research Fellowship Awards

PD

Friday, May 22
9:30 AM – 12:30 PM

The eight GSRA award recipients and the three award recipients present their research and answer questions.

General Assembly and Awards Recognition

PD, DT, S

Sunday, May 24
9:30 – 11:30 AM

The AAPD recognizes well-deserved recipients at an awards ceremony created to honor these recipients. Join your colleagues to honor the important research initiatives that have been conducted over the past year.

The following award presentations will be recognized and announced: the recipient of the Ralph E. McDonald Award sponsored by the Indiana Pediatric Dental Alumni Association, the Paul P. Taylor award sponsored by the Baylor Pediatric Dentistry Alumni Fund, the Samuel D. Harris Research and Policy Fellowship the Sunstar Research Fellowship Award, and the 2020 AAPD Research Poster Competition winners.

Make plans to attend the General Assembly as a member of the AAPD to learn what your Academy is doing for you and how it may affect your practice. Vote on important initiatives and find ways to get more involved in your Academy.

Registration Information

Who Needs to Register

Anyone (member or non-member dentist, dentists' staff or dental student) who wants to attend any portion of the Scientific Program must register. All registration categories for AAPD 2020 include all education sessions (except those specified), complimentary beverages in exhibit hall and the Scientific Proceedings. The guest registration is additional and must accompany that of an attendee; children are complimentary to the meeting, but tickets must be purchased for Social Events. Guests do NOT earn any continuing education credit; if seeking CE Credits, spouses/guests must register as Office Staff.

- Tickets to the Welcome Reception and President's Farewell Dinner are an additional fee and must be purchased separately.
- Additional tickets to all Social Events must be purchased during registration; onsite tickets for these functions may be limited and are subject to availability.

The cutoff for the advance fee is Wednesday, April 1, 2020.

Note: To receive the member registration rate for the 2020 Annual Session, your 2019-20 membership dues must be paid in full.

Residents

- Registration is complimentary if you register on or before April 1, 2020.
- Residents registering after April 1, 2020, or onsite are charged \$150 in registration fees; **no exceptions will be made.**
- Student must purchase a ticket to the Welcome Reception; please see the Social Events section on the registration form and proceed accordingly.

Residents are encouraged to attend the Early Career Dentist Happy Hour on Thursday, May 21. Visit the Social Events page when registering to purchase your ticket.

Registration Methods

Registrations are processed on a first-come, first-served basis. Registration must be done online or over the phone.

Online: annual.aapd.org

Phone: (800) 424-5249

Credit card only. Allow five days for processing and receipt of registration confirmation.

Registration Hours

Please pick up your badge and materials at Registration. Registration is available during the following days/times:

Music City Center—Main Registration

Thursday, May 21	7 AM – 7 PM
Friday, May 22	7 AM – 7 PM
Saturday, May 23	8 AM – 5 PM
Sunday, May 24	8 – 12 AM

JW Marriott—Satellite Registration (Badge Pickup Only)

Griffin Ballroom Foyer	
Thursday, May 21	7 AM – 4 PM

Registration Instructions

- Attendees must be registered for the Annual Session in order to make hotel reservations within the AAPD hotel block.
- Most educational sessions do not require tickets. Seating is on a first-come, first-served basis. Many optional sessions, activities and events require additional fees and must be indicated online when you register; applicable tickets will be included in your meeting materials.
- The Preconference Course, Learning Labs, PALS, BLS and Evidence-Based Dentistry Workshop require additional fees.
- Registration forms must be submitted **on or before April 1, 2020**, to qualify for the discounted fees. Registrations received after April 1, 2020, will be automatically charged the higher registration fees.

Cancellation and Refund Policy

All cancellations postmarked on or before May 1, 2020, will be refunded less a \$150 processing fee (\$50 for office staff and guests).

All cancellation requests must be made in writing to AAPD Registration and Housing Services (aapd@experient-inc.com) for processing on or before May 1, 2020.

No refunds will be given after May 1, 2020. After this date, any extenuating circumstances must be submitted in writing to the AAPD c/o Senior Meetings & Continuing Education Director Kristi Casale at 211 E. Chicago Avenue, Suite 1600, Chicago, IL 60611. Those refunds approved are processed after the Annual Session.

Refunds are not granted for no-shows.

Registration Confirmation

Every effort is made to provide all advance registrants with a confirmation of their registration. This notice will verify whether we received your registration prior to the deadline, and if the tickets requested will be issued.

Name Badges

Name badges must be worn at all times by all registered attendees, including children, in order to gain access to any portion of the Scientific Program, Welcome Reception, access to the Exhibit Hall, hospitality areas and all social events **including the Opening Ceremony and Keynote Address**. Guests must be registered to receive a badge.

Children's badges are provided without charge up to the age of 20; their names and ages must be listed on the registration form.

Questions

If you have any questions regarding registration or housing, contact AAPD Registration and Housing Service Center at (800) 424-5249; Toll-free U.S. and Canada (Monday – Friday, 9 a.m. to 8 p.m. EST), (847) 996-5876; International (Monday – Friday, 9 a.m. to 8 p.m. EST), or aapd@experient-inc.com.

Housing Information

Please read this information carefully. You must register for AAPD 2020 prior to booking your hotel reservation. All housing reservations must be made through the AAPD Registration and Housing Service Center.

Housing Reservation Methods

Online: annual.aapd.org

Credit card only. Allow 7-10 days for processing and receipt of registration confirmation.

Reservation Deadline

All housing requests must be submitted by Monday, April 22, 2020, by 5 p.m. CST in order to receive the AAPD discounted room rate. Starting Thursday, May 7, 2020, you may contact the hotels directly with your reservation needs.

Housing Information and Change/Cancellation Policies

- Reservations are processed on a first-come, first-served basis.
- All reservations require a credit card guarantee and will only be charged if you fail to arrive on your scheduled arrival date or cancel after the stated cancellation policy indicated on your confirmation.
- Acknowledgement of reservation request is sent after each reservation form is processed, as well as each time a reservation is modified/changed and or cancelled. For online reservation housing, acknowledgement is immediate. Please review acknowledgements carefully for accuracy. If you do not receive an acknowledgement within 14 days of submission, please call AAPD Registration and Housing Services Center at (800) 424-5249.
- All hotel room rates are subject to applicable state and local taxes in effect at the time of check-in.
- AAPD discounted room rates are applicable May 21 – May 24, 2020, subject to availability.
- Changes must be made on or before May 7, 2020, at 5 p.m. (CST) and online by accessing your registration/housing record or in writing via e-mail to aapd@experient-inc.com.
- **All cancellations must be received a minimum of 72 hours prior to arrival in order to receive a refund of your deposit.** No refunds will be given for cancellations within 72 hours of arrival or for no shows.
- A portion of the room rate is used to offset the expense of registration and housing services.

Board Qualifying Examination Preparation Course
Feb. 7 – 9, 2020
Loews Portofino Bay Hotel, Orlando, Fla.

This course will help you prepare for the first step toward becoming a Diplomate - taking and passing the ABPD Qualifying Examination. It will be presented by leading educators and clinicians who will utilize a lecture format to review subjects and materials included in the board examination.

Learn about the various domains contained in the American Board of Pediatric Dentistry examination and how to be prepared for this type of high-stakes written examination. Participation in this course does not guarantee successful completion of board exams.

Speakers

Rebecca Slayton, D.D.S., Ph.D. (Chair)
 Clarice Law, D.M.D., M.S.
 Travis Nelson, D.D.S., M.S.D., M.P.H.
 Juan Yepes, D.D.S., M.D., M.P.H., M.S., Dr.P.H.

Who Should Attend

AAPD members and student members preparing for the American Board of Pediatric Dentistry's Qualifying Examination.

Safe and Effective Sedation for the Pediatric Dental Patient
March 26 – 28, 2020
Grand Hyatt Tampa Bay, Tampa, Fla.

This course features the recognized leaders in the field, both in dental anesthesia as well as pediatric dentistry. You'll find didactic lectures, case studies, film clip sessions, panel discussions and hands-on breakouts with personalized attention. This course will offer opportunities to gain hands-on experience while learning airway techniques to rescue patients and will include breakout session with manikin practice with face masks, ambu bags and the insertion of nasal and oral airways; all in a personalized setting with real equipment and monitors.

Course Chair and Speaker

Stephen Wilson, D.M.D., M.A., Ph.D.

Course Vice-Chair and Speaker

Bobby Thikkurissy, D.D.S., M.S.

Speakers

Alan Milnes, D.D.S., Ph.D.
 Christine Quinn, D.D.S., M.S.

Who Should Attend

Any dentist who sedates children in their office and wants to be taught by the leaders in the field who wrote the current AAPD-AAP Guidelines.

Pediatric Sedation Emergencies Simulation Course
March 29, 2020
Center for Advanced Medical Learning & Simulation, Tampa, Fla.

While no one ever expects an emergency situation to arise, attending this course will help you and your team to be more prepared should the unexpected occur. This course is designed to simulate emergencies that may occur in a pediatric dental office. It will offer some didactic materials but will focus on team-driven assessment and responsiveness to situations that might arise during sedation of children for operative care. The course is intended for pediatric dentists who are currently using sedation techniques in their office and will allow for the participant to make quick assessments of patient status and simulate airway techniques, while managing real-time trending of physiological status with the goal of stabilizing the patient. You will be able to immediately implement training protocols for your practice that you've learned in the course.

Course Chair and Speaker

Stephen Wilson, D.M.D., M.A., Ph.D.

Course Vice-Chair and Speaker

Bobby Thikkurissy, D.D.S., M.S.

Speakers

Alan Milnes, D.D.S, Ph.D., F.R.C.D.(C)
 Christine Quinn, D.D.S., M.S.

Who Should Attend

Pediatric dentists who wish to sharpen and practice their cognitive skills and rescue techniques involving emergent pediatric sedation scenarios using SimMan technology.

CE Hours

9* hours

*Two (2) hours required online learning in advance and seven (7) hours hands-on.

ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry.

Master Clinician Program Scholarship Applications Being Accepted

A switch from an office practice to an academic career may seem like a daunting challenge – it needn't be. An academic career provides the practicing dentist a new opportunity to utilize their experiences in shaping the careers of the aspiring professional. Dentists that teach also have a greater opportunity to develop new techniques and innovations in care through research and scholarly activities and can also influence national dental education policies through service with the AAPD, ADA, ADEA, HRSA and NIDCR.

Other benefits of an academic career include improving access to oral health care through community service, mentoring of residents, full- or part-time employment with benefits and personal and professional growth.

Selected candidates will attend the Academy for Advancing Leadership's Institute for Teaching and Learning (ITL) in Atlanta, Ga., from Aug. 23-26, 2020, as well as receive complimentary registration to the AAPD Comprehensive Review of Pediatric Dentistry continuing education course.

Scholarship applications are available under Awards and Fellowships on the AAPD website. <https://www.aapd.org/resources/member/awards-and-fellowships/>. Applications must be received by April 24, 2020.

Save the Date – Annual Joint Academic Day

Wednesday, May 20

8 AM – 5 PM

(Invitation Only)

Join your colleagues for the annual Joint Academic Day. The morning plenary session is being developed with topics relative to pre and postdoctoral program directors, such as, The Role of Care Coordinators in Pediatric Dentistry, Evidence Based Learning Theory, and more.

In the afternoon, the Society of Predoctoral Program Directors and the Society of Postdoctoral Program Directors will hold discussions on issues relevant to predoctoral and postdoctoral topics of interest. These include topics such as, emerging technology in dental education, communicating with parents, integrated board exams, etc. for predocs and ADEA Pass Functionality, sedation, safety and training, etc. for postdocs. Additional information on Joint Academic Day will be available in March *PDT*.

For further information, please contact the Education Development and Academic Support Manager Leola Royston at (312) 337-2169 or lroyston@aapd.org.

Sponsored by Elevate Oral Care

NIH LRP Award – Beau Meyer

Dr Beau Meyer, assistant professor at the University of North Carolina Department of Pediatric Dentistry, was awarded a National Institutes of Health (NIH) Loan Repayment Program (LRP) award through the National Institutes of Dental and Craniofacial Research. The award will help offset \$70,000 his student loan debt over a two-year period. Meyer will participate in a mentored research project in the context of the NIDCR-funded study U01DE025046

(Genome-wide association study of early childhood caries – ZOE-G4S; PI: Kimon Divaris). The parent project is a large-scale genetic epidemiologic study of oral health in early childhood, comprising clinical research, dental public health, behavioral, environmental and genomics components. As part of the LRP, Meyer's project applies geographic information systems (GIS) analytic techniques to behavioral and clinical oral health data. Socio-contextual factors, including location or geographical information, are likely influential on both oral health and dental care-seeking patterns of young children, and their parents' perceptions and experiences will be insightful with regard to specific beneficial or detrimental elements that can offer targets for interventions. The primary objective of his project is to understand socio-contextual and geographic determinants of dental care-seeking (e.g., routine care, emergency care, or no dental care) among preschool-age children enrolled in Head Start centers in North Carolina. The project will contribute to the knowledge base using a well-characterized population-based cohort of participants of low-income families in North Carolina.

In addition to research, Meyer is the director of the UNC Pediatric Dentistry predoctoral program and is involved in teaching D.D.S. and graduate students. He is an active member of the medical staff at UNC Hospitals and practices in the Dental Faculty Practice in the School of Dentistry. Meyer serves the AAPD as an expert consultant to the Pediatric Dental Medicaid and CHIP Advisory Committee and is the Public Policy Advocate for the North Carolina Academy of Pediatric Dentistry.

SEALANTS

THE BIG AUTHORITY ON LITTLE TEETH

What are sealants?
Sealants protect the grooved and pitted surfaces of the teeth, especially the chewing surfaces of back teeth, where most cavities in children are found. Most of clear or colored plastic sealants are applied to the teeth to help keep them cavity-free.

SEALANTS

How do sealants work?
Even if your child brushes and flosses correctly, it is difficult to remove plaque — the sticky, sticky, sticky substance that gets stuck in the grooves and pits of teeth — from all the nooks and crannies of teeth. Sealants “fill in” these spots, blocking out bacteria and sugar, thus reducing the risk of decay.

How long do sealants last?
Research shows that sealants can last for many years if properly cared for. However, your child will be growing throughout the time sealants are on. If your child has good oral hygiene and avoids being hard on their teeth, sealants will last longer. Your pediatric dentist will check the sealants during regular dental visits and recommend re-application or repair when necessary.

before sealant application *right after sealant application*

What is the treatment like?
The application of a sealant is quick and involves little to no pain for your child. The tooth is first cleaned, dried and conditioned and then the sealant is painted on the grooves of the teeth and allowed to harden or hardened with a special light. Your child will be able to see light when the application is done.

How much does it cost?
The treatment is very affordable, especially in view of the relative disease prevention it offers your child. Most dental insurance companies cover the procedure, though copays, deductibles, limits and other restrictions may apply. Check with your health plan provider about your child's coverage and ask to see pediatric dentists about the exact cost of sealants for your child.

Which teeth should be sealed?
The central incisors of children rarely have the grooved surfaces that are most at risk of decay, and therefore are less likely to require sealant application. Check with your pediatric dentist about your child's coverage and ask to see pediatric dentists about the exact cost of sealants for your child.

If my child has sealants, are brushing and flossing still important?
Absolutely! Sealants are only one step in the job your dentist will continue to do. Brushing, flossing, balanced nutrition, limited snacking, and regular dental visits are still essential to a bright, healthy smile.

The American Academy of Pediatric Dentistry (AAPD)

The American Academy of Pediatric Dentistry (AAPD) is the recognized authority on children's oral health. In addition to children and family, the AAPD promotes comprehensive pediatric and clinical guidelines, education and behavior guidelines, practice and procedure, and other health care professionals who better understand and provide a continuing professional education for pediatric dentists and general dentists who care for children. Founded in 1930, the AAPD is a non-profit professional membership association representing the specialty of pediatric dentistry. Its 10,000 pediatric dental primary care and comprehensive dental specialty dentists are actively working, nationwide and worldwide, to provide the best care possible. For further information, please visit the AAPD website at <http://www.aapd.org>.

SEEKING PEDIATRIC DENTISTS

ALASKA—FAIRBANKS. We are looking for a full time pediatric dental associate to start Summer, 2020 in search of adventure and an amazing opportunity. Two new and modern pediatric dental offices with all the fun equipment (Isolites, Valo 3 second curing lights, 2 iPlus hard/soft tissue lasers, iTero 2 intra-oral scanner, digital x-rays and pano, paperless Dextrix charting). GA cases at local hospital, and oral conscious sedation in the offices. Compensation is based on a percent of collections or a daily average guarantee, whichever is higher. You will keep more of what you earn because Alaska does not currently have a state income tax or sales tax! I will disclose specifics to interested parties but can say that the guarantee is much higher than most if not all current opportunities. We strive for the highest quality care, both technically and chair side. High ethics and efficiency are a must. We expect whoever accepts this position to be spoiled with an amazing income, staff and office, and living in easily one of the most amazing states! Requirements: 1. Alaska Dental license 2. Completion of a Pediatric dental residency with certificate 3. Board eligible or certified 4. 2 year contract. Please e-mail resumes to youngsmiles1@yahoo.com.

CALIFORNIA—SAN DIEGO. Great opportunity for Pediatric Dentists in the San Diego County area. Join our team and be a part of something as extraordinary as the children you treat. With six locations, we are looking for someone compatible who is personable, enthusiastic, caring and someone who loves what he/she does. Currently, we're seeking both part-time and full time positions with GREAT compensations, relocation and sign on bonus packages. For more information on our practice, please feel free to check out our website www.thesuperdentists.com and see for yourself why The Super Dentists is San Diego's largest, most trusted and top awarded pediatric dentistry practice. Please send your resumes to nicki@thesuperdentists.com or call [619] 548-8772 for more information on the opportunity. Requirement: Must have a Pediatric Dentist CA License.

FLORIDA—FORT MYERS. Pediatric Dentistry of Florida, Dr. Tim Verwest, D.M.D. & Associates is looking for a full-time associate to join our award-winning and growing practice. Our two beautiful locations are found not far from the soft sands of sunny Southwest Florida. We are looking for someone who is enthusiastic about their work, has exceptional time management, and strong clinical and treatment planning skills. Our practice locations are in the cities of Fort Myers and Naples and the associate will work different days at each office. This is an excellent opportunity for candidate who wants a great work-life balance along with endless beaches and shopping/dining options during their off time. Our team delivers exceptional patient services and keep the day-to-day operations of the

office running smoothly. The ideal candidate will be looking to build a long-lasting career, expand their clinical skills, and grow the practice. Dr. should be comfortable performing all phases of pediatric dentistry. The position is F.T. - Monday - Friday 9 am - 5pm. Excellent compensation plus benefits-401K + Medical. The position is for immediate hire. All experience levels considered. Special preference will be given to Florida Board Certified Pediatric Dentists or those who have passed the ADEX. Duties and Responsibilities: Perform all phases of pediatric dentistry services in a clinical setting. Generous guaranteed salary for the first year (\$1,400 per diem per day) health care benefits, clinic hours: Monday - Friday, 8 am to 5 pm (if you want 4 days we can work that out) 401K. Requirements: D.D.S. or D.M.D. degree, licensed in the state of Florida. Background experience in conscious sedation and hospital dentistry. Commitment to quality patient care and patient education of dental health. Interested parties please e-mail your resume to Jeffs@drverwest.com, Jeffrey Shafer, Marketing HR Director.

FLORIDA—SEBRING. A well-established, successful, multiple location private practice located in Central Florida is seeking a full-time board certified or board eligible pediatric dentist. Dental offices are state of the art, paperless, and offer a large variety of dental services (SDF, ICON, laser procedures, nitrous, conscious sedation, IV sedation). We are searching for a compassionate, outgoing, kind, and enthusiastic personality who can work with an amazing team to care for our unbelievable patient base. In addition, the successful candidate must have an impeccable work ethic and the ability to work with families from culturally diverse patient populations. Please send resumes to drkindell@evergladesdentist.com.

MINNESOTA—ROCHESTER. Popular and thriving pediatric clinic in the area of Rochester, MN is looking for a partner to buy-into the practice. New partner will be taking over for a retiring dentist. This clinic has a unique and innovative scheduling system that allows for maximum work/life balance all the while allowing the practice to grow (there is currently a 6 month waiting list). There are 5,800 active patients with 9,825 patients seen in the last 12 months and approximately 40 new patients seen per month. The average three years of collections total approximately \$1,850,000. The practice is also located in an amazing stand alone building that was designed for young patients. The building boasts 9 treatment rooms and 1 exam room. The current owners also have ties to Mayo Clinic. Pediatric Dentist with at least 2 years experience is preferred, but not required. Please e-mail resumes to hilarybecchetti@pinelakelawfirm.com.

MINNESOTA—SARTELL. There are two main offices located approximately 45 minutes northwest of Minneapolis/St. Paul with two additional satellite offices. The practice is fee for service and all locations are new/recently renovated and equipped with the latest technology. Our practice success and enjoyable work environment is largely due to the

outstanding individuals we work with. We believe strongly in investing in our entire team and making sure whoever joins this practice is successful. We offer an outstanding compensation and benefit package in addition to the potential for ownership. We look forward to hearing from you and discussing the details of this opportunity. Please e-mail resumes to aleidar@dfekids.com.

MISSOURI—KANSAS CITY. Exciting practice opportunity for a full-time Pediatric Dental Specialist to join our growing multi-specialty dental group. Practices are doctor-owned and managed, with a team of Pediatric Dentists, Orthodontists, and General Dentists working together to form this well-established and successful group. Great service and existing marketing strategies; averaging over 150 new patients per month. Offering 32-35% of collections, with a starting base salary of \$12k+ per month. Average pediatric dentist works days/week 2 in newly remodeled, state of the art multi-specialty office and 2 in OR for general anesthesia cases. Earning \$420k/year, not including ownership profit distributions from all other practice profits, including orthodontics. Incredible growth potential, with room for expansion to additional locations, including Texas Colorado. Investment and ownership opportunities available for the entrepreneurial-minded individual. *Ask about our sign-on bonus!* <https://www.compassdentalservices.com/careers> to apply online or for more information. Requirements: D.D.S./D.M.D. with Pediatric Specialty Program Completion. Call [913] 601-4413 or e-mail shahr@thesmilespot.com for more details about this exciting opportunity.

TEXAS—SAN ANTONIO. We are looking for a Pediatric Dentist (part-time or full-time) for growing practices in San Antonio, TX. The work days would be 3 to 4 Days per week . Able to start immediately after insurance credentialling. Full Time Benefits available such as Paid Time Off, Holiday pay, C.E. allowance, License reimbursements and more. Pay is percentage of collections or daily rate (whichever is higher). We are a fun, private practice pediatric dental group looking for the right Associate. Our team is experienced and knowledgeable with pediatric dentistry. For more information please e-mail Dr. Ayala at pedodocjobs@gmail.com or call [210] 632-4560.

TEXAS—BELTON. We are a clinician owned group that consists of board certified Pediatric Dentists, Orthodontists and Oral Surgeons with an Associate Pediatric Dentist opportunity available in the https://en.wikipedia.org/wiki/Killeen-Temple-Fort_Hood_Metropolitan_Statistical_Area. This is a growing community with opportunities to settle down outside of the fast paced urban lifestyle while still being only an hour away from all that the Austin area offers. Copperas Cove is known as the Five Hills area due to its beautiful creeks and valleys and the Belton area has a wonderful school district that received the Texas Education Agency's highest accountability rating (met standard) based on student performance on the State of Texas Assessment of Academic Readiness. Please e-mail your C.V. to joinourpractice2010@gmail.com for more information.

TEXAS—AUSTIN. We are a Pediatric Dental Practice, located in and around the Austin area with multiple locations to fit the needs of our diverse population. Our commitment is to provide the highest quality comprehensive dental and orthodontic care to the children and teens of the Austin community in a compassionate and caring environment. We truly believe that each patient is unique. We take the time to develop the perfect treatment plan for each child that sits in our chair, treating everyone on a case-by-case basis. Austin is consistently rated one of the best cities to live in and for good reason. It is a hub for live music, the food is amazing, and there are more outdoor activities than you could ever get to. One of the keys to long term happiness and success is the ability to work and live in a city you love. We know you will love your time in Austin! We offer a comprehensive compensation package: -Full Medical Benefits -Company Paid Life Insurance -Company Paid Long Term Disability Insurance -401K with up to 3.5% company matching New grads welcome to apply. Please e-mail resumes to Joinourpractice2010@gmail.com.

TEXAS—HOUSTON. Private Pediatric dental practice seeking a full-time or part-time pediatric dentist. We are a private practice that has experienced tremendous growth. We are looking for someone who has a positive attitude, a strong work ethic, and a passion for serving our pediatric patients and our local community. Our practice operates at the highest standard of care. We offer in-office conscious sedation, IV sedation, and hospital dentistry. Our goal is to find a long-term associate with potential for partnership for the right fit. Houston is a bustling metropolitan city with amazing restaurants, shopping, culture, and of course, sports (Go Astros)! The cost of living and quality of life is among the best in the country. This is a unique, unparalleled opportunity. Requirements: Certificate in Pediatric Dentistry and Board-eligible or Board Certified. Please e-mail resumes to drluu@bunkerhillpediatricdentistry.com.

FACULTY POSITIONS AVAILABLE

SOUTH CAROLINA—CHARLESTON. Pediatric Dentistry The Medical University of South Carolina, James B. Edwards College of Dental Medicine, invites applications for a full-time tenure-track faculty position as the Pediatric Dentistry Graduate Program Director. Located in the historical peninsula of Charleston, SC, the Medical University of South Carolina is the States only comprehensive academic health science center. The primary area of responsibility of the faculty position is to lead the Pediatric Dentistry Graduate Program, including active participation in the teaching and patient care components of the program. Other expectations include teaching pediatric dentistry in the D.M.D. program and conducting research in related areas. The ideal candidate must have excellent leadership, mentorship, administrative, and organizational skills. In addition, the candidate must have a creative and positive attitude toward maintaining a team-oriented work environment. Outstanding opportunities exist for teaching and curriculum development and participation in an active intramural faculty practice. Requirements: Candidates must possess a D.D.S.

or D.M.D. degree or equivalent and a certificate or masters degree from a CODA-accredited graduate pediatric dentistry program. Candidates must possess the qualification required to obtain a South Carolina dental license and an appointment to the medical staff of MUSC Board certification in pediatric dentistry and previous teaching and research experience are required. Academic rank and salary will be based on the candidate's qualifications and commensurate with level of experience. Preference will be given to applicants with demonstrated expertise in didactic and clinical teaching, scholarship and program administration. Review of candidates will begin immediately and applications will be accepted until

the position is filled. The Medical University of South Carolina is an Equal Opportunity/Affirmative Action employer. Please submit a letter of interest including statement of career goals and curriculum vitae to: Dr. Martin Steed, Search Committee Chair, Medical University of South Carolina, 173 Ashley Avenue, BSB 453, Charleston, South Carolina 29425. <https://web.musc.edu/human-resources/university-hr>.

CANADA

ALBERTA—CALGARY. Are you Positive, Passionate, Enthusiastic and Motivated? We are looking for a new graduate or experienced Pediatric Dentist who is committed to outstanding patient care to join our vibrant, growing family! We are a well-established practice in majestic Calgary, Canada. We offer the unique opportunity to care for patients in our two beautiful locations, as well as our own private surgical facility, staffed with Pediatric Anesthesiologists. Hours, days of work and buy-in are open for discussion. OR time is guaranteed from day one. If you are the right individual who is a strong clinician, communicator, team-player and patient-educator, please contact us in confidence at kidsmiles2020@gmail.com. Generous remuneration, a monthly minimum and signing bonus/moving expenses offered.

How Would You Like To Have The Best, The Happiest, And The Most Competent Pediatric Dental Assistants **Who Actually Make You Money?**

The Pediatric Dental Assistants Association is proud to accept memberships from qualifying pediatric dental offices. Take a look at everything that is included in your exclusive membership:

- The Annual PDAA Conference* - an excellent place to keep your PDAs connected and excited to be part of bigger community of high-performing PDAs.
- Pediatric dental assistant video training modules in key practice areas with optional Q&A assessments.
- Email support from Dr. Haugseth personally.
- 24/7 access to videos and training modules to allow learning during downtime at the office, at the house, or even from a tablet.
- Opportunity to request new training modules to be developed.
- A bi-monthly newsletter filled with fun, helpful news and information.

...and so much more!

As a PDAA member, your practice receives terrific benefits. Your dental assistants gain valuable knowledge and training. Their increased abilities help grow and develop your practice. And overall communication and patient care are greatly improved. Learning new skills and sharpening the skills of your existing assistants is the key to keeping your practice happy, productive, **and** profitable.

**additional fee*

Maximize your PDA's value to your practice!

Vella®: The Versatile Varnish.

The fluoride varnish experience that's actually pleasant for both you and your patients.

No matter their age, patients are happier when you apply Vella's smoother, less gritty formula with a "thin to win" technique, leaving them with just the sweet scent and taste of fresh, fun flavors.

You're happier too. Vella's clear formula applies easily in a wet field, dries quickly, and provides fast fluoride release and uptake at two hours¹. Sweetened with Xylitol, Vella contains NuFluor®, our combination chemistry featuring fluoride, calcium and phosphate for greater relief of hypersensitivity.

Gluten-free Vella is available in two package options: The sturdy Vella stick, or VellaMini, for the back-of-the-glove application technique. Use it and make everyone happy.

Rainbow[®] Stabilizing System

Will Your Next Patient Pose A Safety Risk?

When there is a risk of sudden, unsafe movement, you owe it to your patients and to your practice to use safety equipment specifically designed for dentistry.

The **Rainbow[®] Stabilizing System** consists of a colorful, breathable mesh wrap to prevent patient over-heating, and a padded vinyl-covered board for stability. Together, they help prevent kicking, grabbing and thrashing that can pose a danger for all involved.

Need stabilization for larger patients? Or do you need additional accessories such as a head stabilizer? We've got your practice covered.

To learn more about the breadth of our **Rainbow Stabilizing System**, or to place an order, visit our website at <https://specializedcare.com>. Or call us at 800-722-7375.
