

Policy on Emergency Oral Care for Infants, Children, Adolescents, and Individuals with Special Health Care Needs

Latest Revision

2017

The American Academy of Pediatric Dentistry recognizes emergency care for infants, children, adolescents, and individuals with special health care needs is an essential duty of every dentist. The American Dental Association's *Principles of Ethics and Code of Professional Conduct* states that "dentists shall be obliged to make reasonable arrangements for the emergency care of their patients of record".¹ The American Academy of Pediatric Dentistry recommends dentists should provide instructions to the parent for accessing emergency care.¹ Availability of after-hours emergency care is an important aspect of continually accessible care.² Additionally, when consulted for a dental emergency by patients not of record, the dentist should make reasonable arrangements for emergency dental care. If emergency dental treatment is provided, the dentist should recommend that the patient return to his/her dental home unless the parent expresses a different preference.¹
